

INSTALLATION INSTRUCTIONS

Saab 9-5 (2002 - 2005)

RFL

Parts needed

2x Aharon Mini D15/D25 projectors
2x Aharon H7 high beam splitter cables
2x Custom made brackets + mounting hardware

Tools needed

PZ / PH screwdriver / bit
7mm socket
Dremel tool
Coffee and a bit of patience

Instructions

STEP 1 Open up the headlight

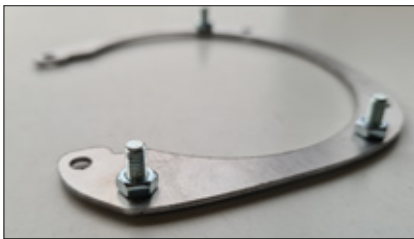

In order to replace the projector with the brand new Aharon Mini D15/D25 projector, you need to open up the headlights and remove the reflector. We don't have a specific installation video for this headlight, but please see this video as an example on how to open a headlight; [HTTPS://WWW.YOUTUBE.COM/RETROFITLAB](https://www.youtube.com/RETROFITLAB)
After opening the headlight, unscrew the projector and follow the steps below.

Make sure to keep the screws you need them in a later stage.

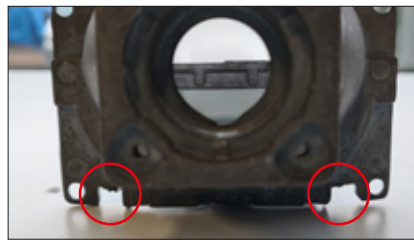

STEP 2 Mount the bracket

Mount the brackets + hardware like shown in the pictures below.

STEP 3 Modify the reflector

Before you can mount the bracket + projector properly, the reflector and projector needs to be modified a bit. See the pictures below, the highlighted parts need to be trimmed / removed.

STEP 4 Mount the projector

Mount the projector like shown below using the original screws to secure the bracket.

Before mounting the projector make sure to plug in the supplied bi-xenon/solenoid cable!
