

# INSTALLATION INSTRUCTIONS

## SKODA FABIA - 6Y

### Parts needed

2x Aharon Mini H1 projectors  
 2x Aharon H7 high beam splitter cables  
 2x Q25 - AMP adapter cables  
 2x Custom made brackets + mounting hardware

### Instructions

#### STEP 1 Opening up the headlight

Open-up the headlight, remove the reflector and take it out.  
 After this, remove the old projector by unscrewing the 4 brass locknuts on-top of the mounting points.

Make sure to keep the brass locknuts you need them in a later stage.

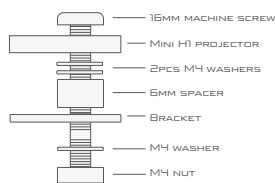

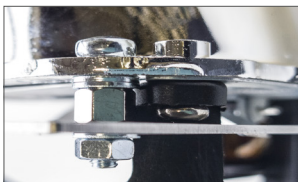

#### STEP 2 Installing the spacers

In order to mount the new projector and bracket you need to install the 2 threaded spacers on-top of the 2 bottom mounting points and mount the 2 black plastic spacers to the top 2 mounting points.

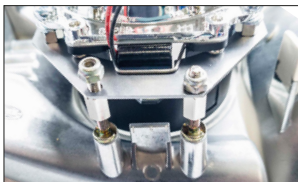

#### STEP 3 Mounting the bracket

See the picture below for the correct way to mount the bracket

#### STEP 4 Mounting the projector

Mount the projector + bracket on-top of the mounting points and use the brass locknuts to secure the bracket.

### Need help?

For more info about opening the headlight and how to remove the OEM projector please scan the QR-code.

Please note; we don't have a video for this specific headlight but the general procedure is the same.
