INTRODUCTION

Your new Quad 4K Docking Station can connect to any host with USB A or Type C connectors providing a fully backward-compatible and future-proof docking solution. Allowing you to connect up to four additional monitors through a single USB cable.

The Quad 4K Docking Station Software allows full configuration of all additional USB displays, including:

- Support for up to 4 additional USB Displays (Windows)
- Support for up to 4 additional USB Displays (Mac OS X)
- Expand USB 3.0 connectivity
- Supports 4 Displays
- 2.5 Gigabit Ethernet
- Mic In and Audio out
- Extended, Mirrored, Primary Display
- Extend left, right, above, or below
- Rotation
- Layout of displays
- Color Depth

FEATURES

- Compatible with both Type-C and Type-A Laptops and Desktop Computers
- Supports 2 displays at resolutions up to 5K (5120 x 2880@60Hz) when using dual DP ports simultaneously
- Quad 4K Output
- Supports Extend and Mirror Display Mode
- Supports 5.1 Channel Surround Sound
- Built-in USB GPU, Plug and Display
- Combo microphone input and audio output
- SuperSpeed USB 3.0, speeds up to 5Gbps and backward compatible with 2.0/1.1
- SuperSpeed+ USB 3.1 Gen2 port up to 10Gbps
- Built-in 2.5 Gigabit Ethernet RJ45 for increased network performance
- Power Delivery up to 100W over USB Type-C connection
- USB-C 30W charging port for phones and tablets

CONTENTS

- VT8000 Docking Station
- Power Adapter 180W
- USB-C to USB-C Cable (1M)
- USB-C to USB-A 3.0 Adapter
- USB-C Cable Screw Adapter
- Quick Start Guide

DOCKING STATION CONFIGURATION (Continued)

Correct way to connect 5K displays

Wrong ways to connect 5K displays

Note:

You can only connect either the left two DP ports or right two, you cannot interconnect them randomly.

DRIVER INSTALLATION (Windows)

Step 1

The following section shows you how to install the Docking Station software on different operating systems.

Download and install the latest Displaylink software. Select the driver according to your operating system.

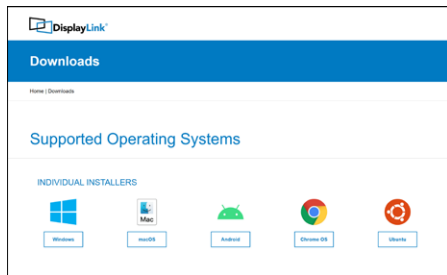

Please visit displaylink.com/downloads and download the latest drivers. Displaylink-provided drivers are always compatible with the USB Docking Station.

Step2

Select the downloaded file double click to begin the DisplayLink software installer

Step3

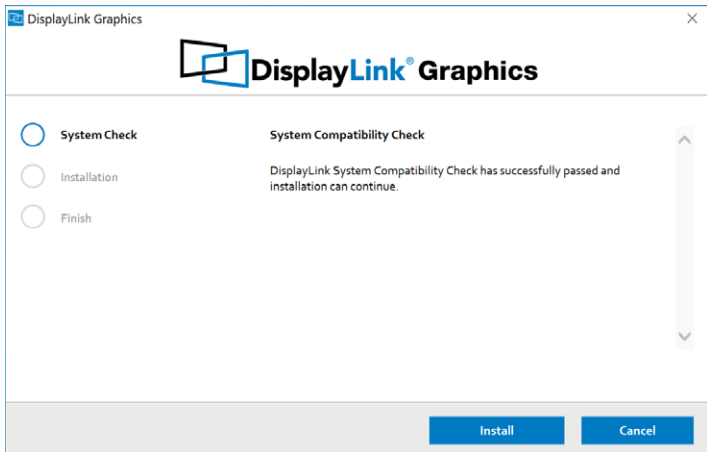

Once the installer begins a window will pop up and verify that your system is compatible with DisplayLink USB Graphics.

DRIVER INSTALLATION (Windows Continued)

Step4

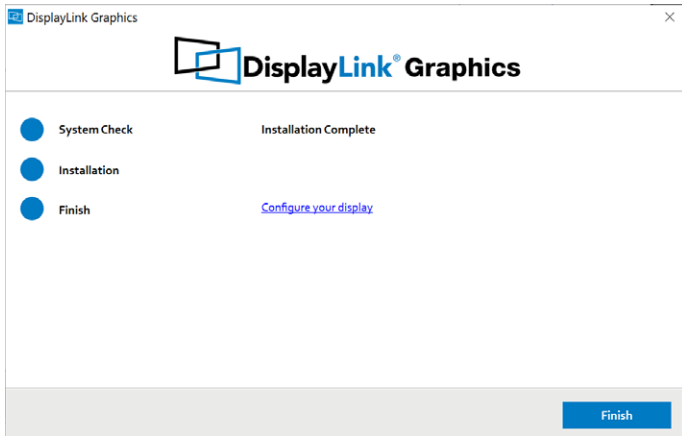

Click "Install"

DRIVER INSTALLATION (Windows Continued)

Step 5

Once the "Finish" button appears the install is complete and your system will may need to reboot. If the option pops up click "Reboot" to finalize the driver installation.

WINDOWS SETUP

Click the DisplayLink "Icon" at the lower right corner to set up audio and video, click "Audio setup"

Step 2

Choose Speaker

Step 3

Choose Microphone

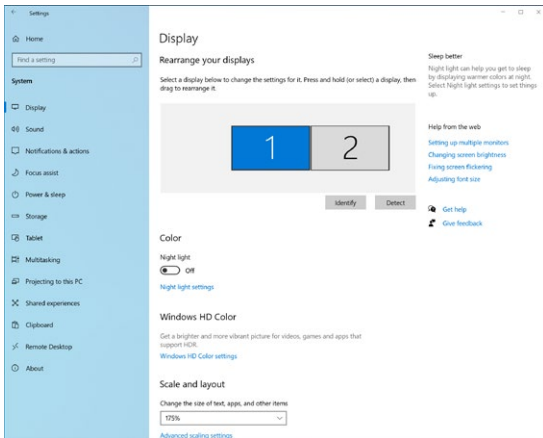

WINDOWS SETUP (Continued)

Video Setting: Windows 10

Display mode

- Click video setup
- Select Display and choose Orientation then select Extend desktop to this display.

DRIVER INSTALLATION (macOS)

Introduction: This guide applies to software version 1.3 and above of the Mac software.

What is the macOS Driver?

The macOS driver is designed for macOS 10.4 - 11 to enable you to add an additional monitor to your mac using Displaylink technology. This software allows you to run your DisplayLink UGA devices on any Intel or M1 based Mac desktop or laptop, allowing you to connect up to 4 additional monitors via USB.

Please Note: Power PC-based Macintosh computers, such as late-model iMacs, PowerBooks and PowerMacs, are not currently supported.

DRIVER INSTALLATION (macOS)

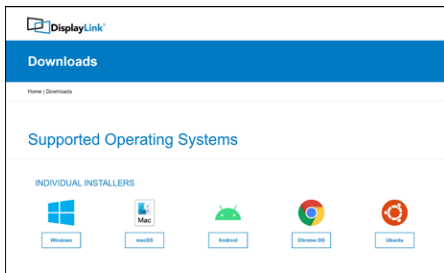

Step 1

Download and install the latest Displaylink software. Select the driver according to your operating system.

Please visit displaylink.com/downloads and download the latest drivers. Displaylink-provided drivers are always compatible with the USB Docking Station.

DisplayLink USB Graphics Software supports macOS 10.4 - 11. M1 macs are supported on software version 1.3 or later.

Please Note: Power PC-based Macintosh computers, such as late-model iMacs, PowerBooks and PowerMacs, are not supported.

DRIVER INSTALLATION (macOS)

Step 2

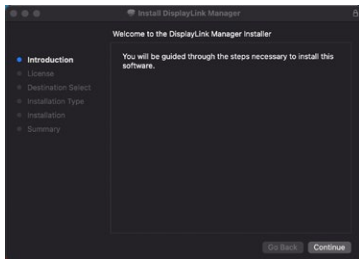

Click "Continue" to start the installation process.

Step 3

Once prompted input your account password and click "Install Software"

Step 4

After installation is complete restart your system. Your dock should now be working. If not, make sure the Displaylink Manager application is running by entering "Displaylink" into the finder and running the DisplayLink application.

MANAGING MULTIPLE DISPLAYS (macOS)

When a new display is connected to your Mac, it will default to being extended to the right of the main display. To configure the settings for each of your displays, select "Displays" from the "System Preferences" menu. This will open the "Display Preferences" window on each of your displays allowing you to configure each.

Display Preferences:

Display Resolutions

Rotating a Display

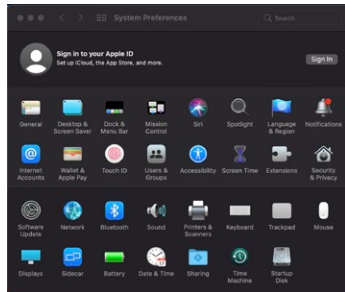

Display Positions

Display to Mirror mode

Display to Extend

Using both extended and mirrored displays

Changing the main display

MANAGING MULTIPLE DISPLAYS (mac OS Continued)

To arrange displays and configure mirrored or extended displays click on the arrangement tab.

To move a display, click and drag the display in the arrangements window.

To change primary display, click on the small bar on top of the main monitor and drag in onto the monitor you want to be the primary.

CONFIGURING DISPLAYS FROM THE MENU BAR (macOS)

If you have checked the “Show Displays” ON menu bar in “Display Preferences” then you can configure the displays by clicking the display icon in the menu bar.

This menu allows you to perform the following actions:

- Detect all displays connected to the Mac

- Turn display mirroring on/off

- Set the resolution of both the primary display, and the additional display(s)

- Open “Display Preferences”
