

FAQs

WHAT IS AGELOC BOOST™?

ageLOC Boost is an innovative beauty device system from the world's #1 at-home beauty device system brand in 2017 and 2018*. This powerful, easy-to-use system features patent-pending variable pulse microcurrent technology and potent ingredients that bring out your skin's brilliant best—visibly brighter skin with enhanced radiance and bounce, as well as an improved, more even-looking tone.

HOW DOES AGELOC® BOOST RELATE TO AGELOC LUMISPA® AND AGELOC GALVANIC SPA®?

Nu Skin beauty devices are each designed to treat skin in different, unique ways with different benefits.

- ageLOC LumiSpa is designed for the newly skin-involved consumer. This twice-daily treatment cleanses and treats your skin for a pure, healthy glow.
- ageLOC Boost is designed for the modern skin care consumer who is looking for new ways to enhance their skin's natural beauty. This easy-to-use, two-minute treatment visibly brightens skin, adding bounce and radiance, while promoting gentle exfoliation and healthy cellular turnover.
- ageLOC Galvanic Spa is designed for advanced skin care consumers who want to address various signs of aging. These intensive weekly treatments visibly rejuvenate your face, hair, and body.

WHAT MAKES AGELOC BOOST INNOVATIVE AND EXCITING?

ageLOC Boost features a patent-pending microcurrent waveform with variable pulse technology. When used with Activating Serum, ageLOC Boost delivers visibly brighter, plumper, and bouncier skin. Some results are instant, while others are enhanced the more you use the system. ageLOC Boost bridges the demographic gap between ageLOC LumiSpa® and ageLOC Galvanic Spa®.

Another point of excitement is the design of the ageLOC Boost device. Nu Skin partnered with an award-winning, world-renowned design firm to create a more refined user experience. ageLOC Boost feels ergonomic and is suitable for daily use.

CAN I USE ANY PRODUCT WITH AGELOC BOOST?

To enjoy the best treatment experience, you should only use ageLOC Boost Activating Serum with your device. That's because we scientifically formulated Activating Serum to optimally conduct the unique variable pulse microcurrent.

WHERE DOES AGELOC BOOST FIT IN MY SKIN CARE ROUTINE?

Treat your skin with ageLOC Boost after cleansing and toning. Next, follow up with your favorite serum, moisturizer, and sunscreen.

DOES IT MATTER WHAT TIME OF DAY I USE AGELOC BOOST?

You can use ageLOC Boost anytime. However, we recommend using it as part of your morning skin care routine, so you'll get a beauty boost that lasts throughout the day.

HOW LONG DOES AN AGELOC BOOST TREATMENT TAKE?

ageLOC Boost treatments are recommended daily and only take two minutes.

WHEN WILL I NOTICE BENEFITS AFTER USING AGELOC BOOST?

Some benefits are instant, while other benefits will become more noticeable over time.

CAN I USE AGELOC BOOST IN THE SHOWER? IS IT WATERPROOF?

You should not use ageLOC Boost in the shower or bath because the device is not waterproof (it's water-resistant). Also, you'll want to use the system after showering because Activating Serum is a leave-on product, not one you wash off. You can clean your ageLOC Boost device with water, but do not submerge it.

*Source: Euromonitor International Ltd; Retail Value RSP terms; all channels; 2017 and 2018. Includes at-home Skin Care Devices exclusively paired with topical consumable of same brand. Based on Euromonitor custom research methodology, Jan/Feb2019. Includes electric facial cleansers as defined in Passport database; does not include hair care/removal, body shavers, or oral care appliances.

WHAT ARE THE DIFFERENCES BETWEEN AGELOC GALVANIC SPA AND AGELOC BOOST™ CURRENTS?

ageLOC Boost uses exclusive variable pulse microcurrents to optimize skin and to help reveal a more youthful complexion. ageLOC Galvanic Spa uses direct microcurrents, sometimes called galvanic currents, to deliver charged treatment products that visibly improve aged skin.

CAN I USE AGELOC BOOST WITH AGELOC GALVANIC SPA® FACIAL GELS?

ageLOC Galvanic Spa Facial Gels have been formulated to work with galvanic currents, whereas ageLOC Boost uses variable pulse microcurrents, which are different from galvanic currents. Thus, using ageLOC Galvanic Spa Facial Gels with ageLOC Boost won't work the same and will not provide the same benefits. You should only use ageLOC Boost with ageLOC Boost Activating Serum.

CAN I USE AGELOC BOOST WITH AGELOC GALVANIC SPA POWERMASK AND AGELOC GALVANIC SPA ENERGYES™?

For optimal results, we recommend using only ageLOC Galvanic Spa with both ageLOC Galvanic Spa PowerMask and ageLOC Galvanic Spa EnergEyes. These products were scientifically designed to work with the specific galvanic currents this device uses.

WHY SHOULD I PUT MY ACTIVATING SERUM ON THE DEVICE HEAD, RATHER THAN DIRECTLY ON MY SKIN?

Dry hands are a must when using the device, which is why we've developed a treatment protocol that lets you dispense ageLOC Boost Activating Serum onto the device head, so your hands remain dry.

CAN I START WITH AGELOC BOOST IF I'M BRAND NEW TO BEAUTY DEVICES?

Absolutely. ageLOC Boost is a great introduction to the world's #1 at-home beauty device system brand in 2017 and 2018*. You can also try ageLOC LumiSpa® or ageLOC Galvanic Spa depending on your specific skin care needs.

HOW DOES AGELOC BOOST SUPPORT NU SKIN'S COMMITMENT TO BECOME MORE SUSTAINABLE?

ageLOC Boost's Activating Serum bottle is made with 15% post-consumer resin (PCR), and the product and device cartons are made from virgin paper. Please check your local capabilities and recycle the bottle and cartons where possible. By purchasing ageLOC Boost, you're joining us in taking an active, engaged stride to ensure the future is bright for both the planet and each of us. Please visit www.nuskin.com/sustainability for more information and details on how to recycle.
