It is always advisable to do a small test cut before beginning your project to prevent wasting materials. These settings are meant to be a guide in helping you find the best setting for your machine.

1. Cricut settings are for the Maker, Maker 3, Explore Air 3 and the Explore Air 2 (Smart Set dial on Custom), using a sharp premium fine point blade.
2. Use medium tack for larger transfers, and high tack for smaller, more detailed cuts.
