## FIND YOUR *RING SIZE*

- 1 Print this document on A4 at 100% scale (actual size). Measure the control line and ensure it is exactly 10 cm long on your printout.
- 2 Cut out the measuring band and cut the small slit. Push the pointy end through the slit.
- 3 Wrap the band around the finger you'd like to measure. Tighten it to a comfortable fit and read off your size.

It's normal for your finger's diameter to vary slightly throughout the day. In doubt, choose the larger size.
