

Our aim is produce high quality, long-lasting and effective products that are value for money.

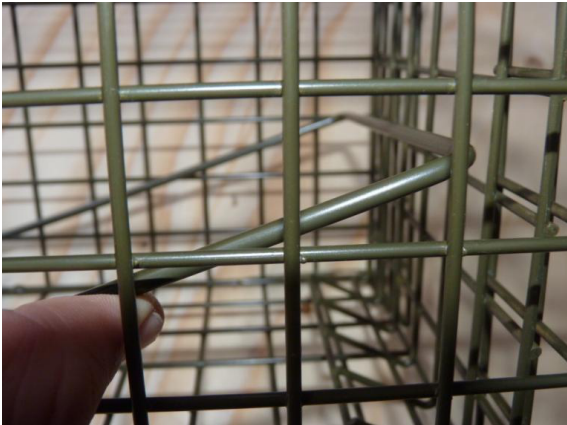

This professional grade Perdix Grey Squirrel Trap is no exception.

The instructions below give a quick guide on how to set your trap. However, before using your Perdix Grey Squirrel Trap you should familiarise yourself with the latest professional advice on grey squirrel control strategies and legislation.

Please visit the Forestry Commission website for further information.

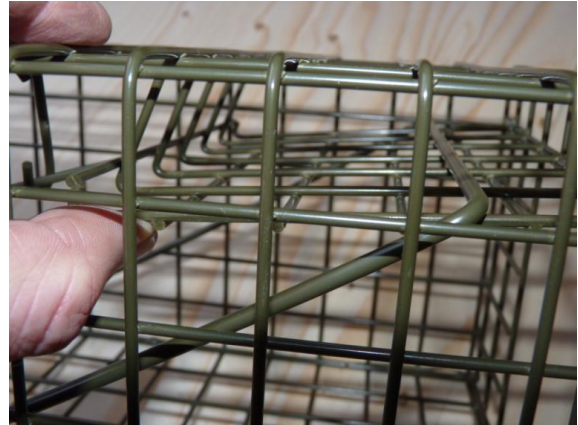

Step 1

Lift locking bar to allow the door to be pushed inwards.

Step 2

Place the rod under the first bar of the door. Make sure the rod is anchored in its wire cradle.

Step 3

Place rod under first bar of door. Ensure rod is resting inside wire cradle.

Step 4

For maximum sensitivity the rod should be set flush with door bar.

Step 5

When set, the treadle plate should be raised from the base of the trap.
