

Decoy Cage (if applicable)

Step 1
Open the decoy cage door by unlatching the locking bar.

Step 2
Clip the perch onto the cage using the carabine hooks. Ensure perch is located underneath the shelter.

Step 3
Clip the green food cup on the inside of the cage.

Step 4
Attach the bottle drinker to the outside of the cage using the white wire located inside the bottle. Ensure the nipple is located within the cage.

Side Entry Catching Cage

Step 1
Open the door by releasing the catch.

Step 2
Open door and lift perch so that bar is located behind vertical rod on door. The door should now remain open.

Step 3
To adjust catching sensitivity, locate the perch rod accordingly on the vertical rod.

Top Entry Catching Cage

Step 1
Push door inwards and secure in place by lifting perch and placing edge of door under screw.

Step 2
To adjust catching sensitivity, increase or decrease screw length.

Placement of Trap

When in use, the decoy cage should be placed alongside the catching cage/s. (Larsen sign sold separately). Cable ties can be used to secure cages together if required.
