

## Parts:

1 x Mink Raft Base  
2 x Tunnel Side Boards  
2 x Tunnel Roof Boards  
1 x Tunnel Lid

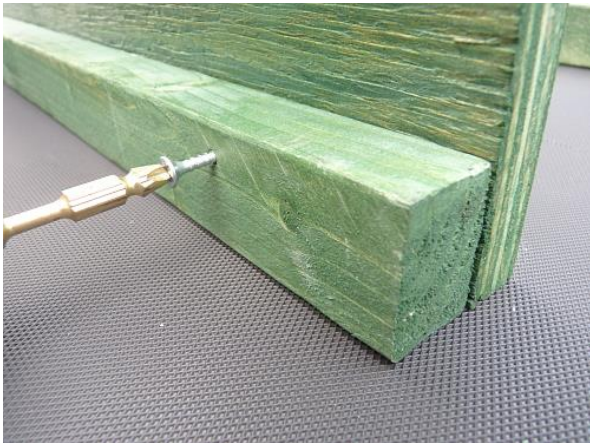

## Fixings:

6 x 35mm Wood Screws  
8 x 50mm Wood Screws  
4 x 25mm Wood Screws  
4 x 20mm Wood Screws

5 x 16mm Wood Screws  
2 x 50mm Dome Head Screws  
2 x Hinge  
1 x Hasp & Staple

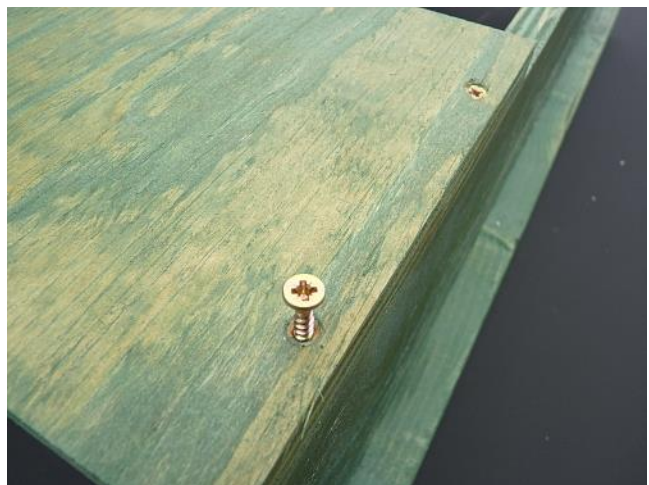

## Step 1:

Using the 6 x 35mm wood screws, attach the tunnel side boards to the inside of the wooden battens where guide holes are located. Attach the two tunnel roof boards to the sides using the 8 x 50mm wood screws where guide holes are located.

## Step 2:

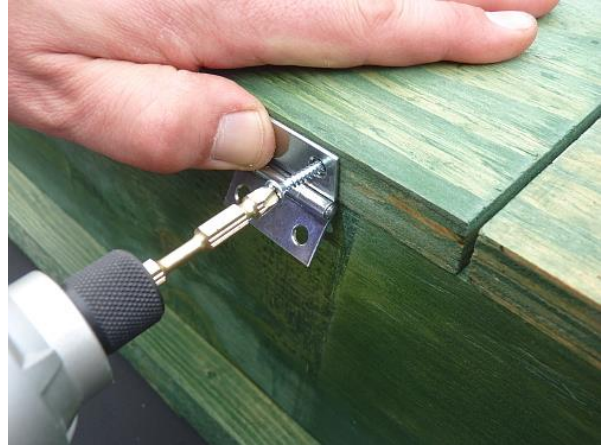

Attach the two tunnel roof boards to the sides using the 8 x 50mm wood screws where guide holes are located.

### Step 3:

Attach 2 x hinges to roof lid using 4 x 25mm wood screws at marked points.

### Step 4:

Attach hinges to tunnel side board using 4 x 20mm wood screws.

### Step 5:

Attach hasp to tunnel lid at marked locations using 3 x 16mm wood screws.

## Step 6:

Position and attach staple to tunnel side using 2 x 16mm wood screws.

## Step 7:

When in trapping mode, the 2 x 50mm dome headed screws can be used to prevent the cage trap from being removed when lid is closed. Insert screws into underside of lid to a length of approximately 25mm so that screw heads are positioned just inside cage.
