

## AJ52Pro Wireless Mouse

Three Connection Methods: BT5.0; 2.4G; USB Wired

DPI: Six Levels Adjustable: 800-1200-1600-2400-3200-10000dpi

Backlight: 7 color rainbow backlight

Description Of The Function Mode:

NO1 - 2.4G mode - if you need to pair the code again, the code is as follows: press the (left + middle + right) buttons at the same time for 3 seconds to enter the code pairing state, and the yellow light of the Scroll wheel flashes quickly. Plug in the USB receiver to complete the code pairing.

2. Bluetooth Mode: In BT mode, search "BT Gaming Mouse" and you can connect and use.

3. Wired Mode: Directly connect the USB cable to be used.

Kind Tips:

Select the default path when installing the driver software, do not change the installation path! ! ! Otherwise, the installation will fail or the driver cannot be started.

Some versions will prompt that the version is too low and needs to be upgraded, just click OK. After the progress bar is finished, close the window and restart the driver software.
