

Measure for Blinds & Shades

Room Name: _____ Window: _____

Windows for standard Blinds or Shades are measured like this:

1. Inside Mounted - Measure A,B & C and give the narrowest dimension of the 3 up to the closest 1/8". Measure just one dimension for D to the closest 1/8".
2. Outside Mounted - Measure to the point you want the blind to cover. Sometimes a little extra may be desired for extra coverage. Usually 1/2" to 1" overall.
i.e. - Roller Shades have almost an inch from the edge of the brackets to the edge of the fabrics. (Overall, not on each side)
3. Refer to our "Fractions Chart" on what dimension to supply/use.
