SOCK HEIGHTS:

CUSHIONING:

Ultra-Light: Our lightest sock for race day or anyone looking for a lighter-than-air feel from a tougher than hell sock.

Ultra-Light Cushion: Provides a light layer of cushioning along the bottom of the foot. Ultra-Light, ultra-comfortable.

Light: Built light, darn comfy and super strong—substantial construction for a lightweight, sure fit.

Padded Light: A lightweight sock with specialized padding exactly, and only, where it's needed. Skiers and riders know what we're talkin' about.

Light Cushion: Light and strong with a thin layer of cushioning along base of foot. Our most versatile construction.

Cushion: Mid-level cushion density under foot. A warm and ultra-comfortable choice when conditions demand it.

Padded Cushion: Take our Cushion sock and add high-density padding exactly where it's needed most—like the along the shin or under foot. Play all day.

Full Cushion: High density cushioning throughout the entire sock for full on comfort and performance.

Extra Cushion: Our thickest, burliest and highest density cushioning makes for a big, bad monster of a sock.
