How to Form and Install Your Root Guard Speed Basket

Knitted Stainless Steel Mesh is Easy on Hands

Convenient Centering Ring Speeds Installation

Above Ground Protection— Extra Length for Securing Basket to Stem/Trunk

Semi-Formed and Pre-Rolled for Speedy Installation

Easy Orientation — Green Mark Up / Tail Down
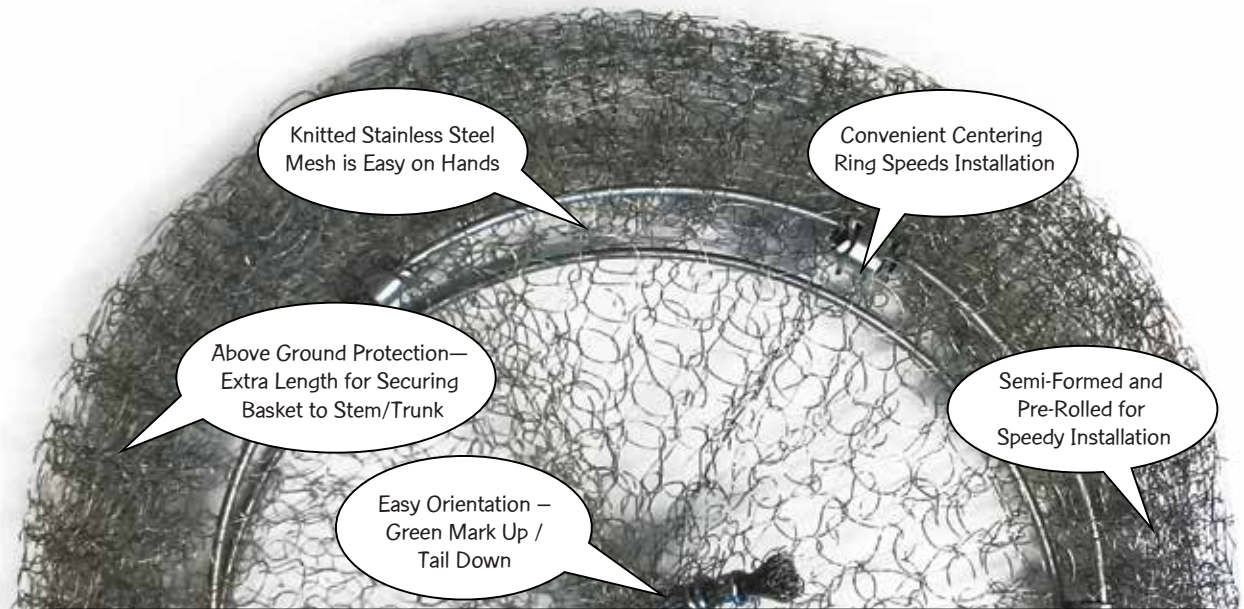

1 Place Speed Basket with tail down, remove the plant from its container and place on top of basket.

2 Roll up the basket over the root ball.

3 Dig hole just large enough for the root ball and plant with remaining basket material above ground.

Optional: Unroll extra basket material and stake or tie to plant stem/trunk.
