Printable Ring Sizer

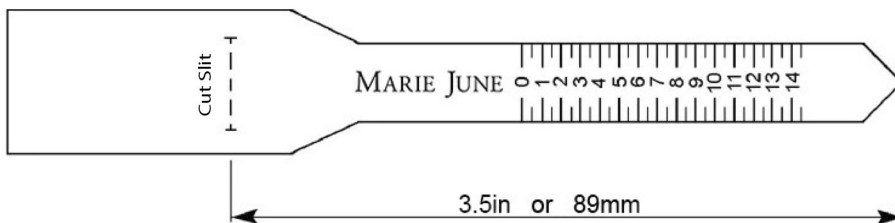

Please ensure that the PDF is printed at 100% scale or at actual size.

Method A: you don't have a ring

1. Print and cut out the paper ring sizer provided below.
2. Cut along the marked 'cut slit' to create an opening.
3. Thread the pointed end through the slit and position it around your finger like the diagram below:

4. Gently pull the pointed end until it fits snugly. Avoid wrapping the paper too tightly; aim for a comfortably snug fit.

Method B: you do have a ring

1. Find a ring that you or your loved one currently wears.
2. Ensure that they wear this ring on the finger you are intending to shop for.
3. Position the inside of your ring atop each ring circle (on the right) until you find the best match.

Tip: If the width of a credit card matches the outline provided here, your print scale is correct.
