Setup Guide

Welcome to the Meural Community

Meural combines the best of art, technology, and design to create products that make us feel something. It's our goal to make art universally accessible, and to help the arts thrive—a mission you're now a part of. To help get you started, here's a brief manual on setting up and using your Meural Canvas.

Table of Contents

Visit meural.com/setup for full walkthrough

Connect your Meural Canvas to Wi-Fi.

1. Download the Meural app

2. Turn your Canvas on

3. Follow the instructions on your Canvas

Once you're connected to Wi-Fi, you can control your Canvas in three ways: the Meural app, gesture control, and my.meural.
Using the Meural app

Even after you connect to Wi-Fi, the Meural app will continue to be useful in choosing artwork for your space, changing Canvas settings, and more.

Gesture control

meural.com/videos#gesture

When using your Meural Canvas, you don't touch the frame itself—just like gallery art. Instead, you wave right, left, up, and down across the gesture sensor (about 1" in front of it).

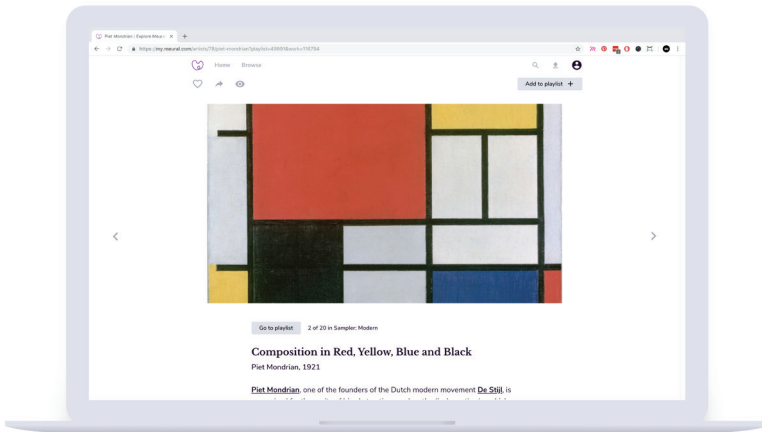

gesture sensors

my.meural.com

You'll use "my.meural" to browse and curate art, as well as change your Canvas settings. On the top right, click on the user icon to access the Scheduler, settings (including light sensitivity, image duration, and more), and your playlists.

my.meural is also a great way to discover new art. Every week our curatorial team adds new artists, playlists, and editorial, so be sure to check in and see what's new. To get unlimited access to all of it, make sure to become a Meural Member (find out more at **meural.com/membership).**

Hanging Your Canvas*

For a video walkthrough, visit **meural.com/setup**

To mount the Meural Canvas on your wall, you'll need:

Tape meausure

Pencil

Drill

¼ inch drill bit

Hammer

Phillips head screwdriver

## *We provide you with these hanging parts:*

Hanging cleat

Screws (with anchors)

Level

*these instructions are intended for drywall
1.

level

60" to floor

Center and level your cleat. We recommend a height of 5' (60") from the floor to the holes on the cleat.

2.

Mark the holes in pencil and drill 0.25" pilot holes 2.5" deep for both.

3.

Separate the screws from the anchors and hammer the anchors into the holes.

4.

Confirm the orientation of the cleat and, with the screws, attach it to your wall.

5.

Plug the power cord's connector into the back **(A)** of the frame.

6.

Hang the Meural Canvas by letting the cleats rest in the metal flaps in the back of the frame.
