CORE VALUES

We constantly develop and we always look for new ways and solutions.

Yet we always stay true to our core values, represented by the three words that really sum everything up.

Saying them is quite easy. Living them is quite a challenge in a fast-moving world of constant change. But we strive!

BRAND HISTORY

PROJOB's modern history dates back to 1998 when founder and designer Tore Parment took his knowledge and experience from the outdoor equipment market and applied it on a new breed of workwear. The ambition has always been to create functionality where it really is needed: In everyday physical work situations.

Tore is still Head of Design at PROJOB, which is now owned by New Wave Group,

a Swedish Company Group with many internationally well-known brands in its portfolio.

Craft Sportswear is a sister company with a brand that is synonymous to the Three-Layer-Principle and the two organisations have a close cooperation with each other.

History is important, since it shows why we are here and where we plan to go next.

SUSTAINABILITY

We have the possibility to contribute and make a difference through our global operations. PROJOB is a part of New Wave Group. New Wave Group is working with social and environmental sustainability under the term CSR (Corporate Social Responsibility). As our customer, you are supporting this work.

New Wave Group has two main strategies to decrease our environmental impact and to cut our emission of greenhouse gases. First of all, we must influence the transportation companies that we are working with. Our membership in “Clean Shipping Index” aims to impact the shipping companies to use cleaner vessels by ranking the most high-performing ships. The Group works with some of the largest transportation companies on the market, all of which have environmental programs in place for their operations.

Secondly, we always strive to improve our internal logistics and work methods. Within our group of companies, we club together as much as possible of our shipments and transportations. In addition to protecting the environment, sustainable solutions can also contribute to the streamlining of our operations.

WE LIKE SUSTAINABLE PRODUCTS

New Wave Group believes in classic design and good quality products - a concept that will never be out-of-fashion. We hope you will enjoy our products for a long time. All products can be customized to your precise demand, which is a good way to ensure long-lasting use and sustainable consumption.

It is important to New Wave Group that our products are safe and free from restricted chemicals. New Wave Group is a member of the Swedish Chemicals Group at Swerea IVF to receive the most updated information on legislation and developments. This supports our active work to reduce and replace chemicals in line with best available technique. All our suppliers must follow the requirements in our Restricted Substance List. The list has been designed in accordance with legislations such as REACH, but also taking into account industry recommendations and standards. As a result, our requirements are often stricter than the applicable legislation.

Learn more about our Code of Conduct and our sustainability work on New Wave Group’s webpage: www.nwg.se/en.

IMPROVING WORKING CONDITIONS

New Wave Group is never far away from the manufacturing of our products. Being represented on site enables us to have a close partnership with our suppliers and to actively monitor their business operations. We have a CSR-team, which consists of full-time staff dedicated to visit our suppliers, monitor and support them with various social and environmental topics.

As a member of BSCI, New Wave Group has adopted the BSCI Code of Conduct. It contains requirements on minimum wage, working hours and the prohibition of child labour, among several other requirements from international conventions like to ILO Conventions and the Declaration of Human Rights. New Wave Group has a commitment towards BSCI to engage our

suppliers in third party examination by independent auditors. Having both internal and external audits is a quality assurance to us. We strive for constant improvements and continuous development.

New Wave Group is a signatory member of the pioneering Accord on Fire and Building Safety in Bangladesh. The Accord is a binding contract between brands, international and local trade unions and NGOs. Its aim is to make all garment factories in Bangladesh safe workplaces, which includes a program of safety inspections and a commitment to ensure that the necessary repairs and renovations are carried out. The Accord will have significant impact on the daily lives of millions of textile workers in Bangladesh. We are proud to be a part of this project!

VENT AIR® is wind and waterproof with breathability. VENT AIR® keeps the body dry and cool while protecting against the forces of weather. The material consists of three-component high-tech weave, a functional material with a coating on the inside and a water-repellent treatment on the outside.

Cordura® is DuPont's brand of extremely durable polyamide material. It is three times as strong as standard polyamide, up to seven times as strong as cotton and yet is fine and supple. We use it primarily as reinforcement in places that are exposed to hard wear.

YKK is a market-leading brand in zippers. The products are of high quality and set the standard for other players in the market.

3M Scotchlite™ person reflex material makes you extra visible when it's dark and the view is bad. The material reflects bright white when it's lit up by the headlights of a vehicle, also when the wearer stands beside the road. 3M Scotchlite reflex material for protective garments exceeds the highest reflex category of the European standards for reflective protective garments, EN471, as well as all strict, standardised tests.

Coats epic has set a new standard in the thread market. It consists of a core of polyester fibre around which is spun yet another polyester fibre. The combination makes for a thread with maximal tensile strength, which results in seams with extreme durability.

Duraflex is the trade mark of the high-quality buckles used in PROJOB clothes, belts and carrying systems.

PrimaLoft® is a brand of patented synthetic microfiber thermal insulation material, originally developed for military use.

CRAFT® is a world leading producer of functional sports apparel and innovative supplier of three-layer-principle garments. Craft provides the fabrics and know-how to our workclimate underwear.

Materials with 37.5°-technology help to keep your body at the ideal temperature 37,5°C. The material contains naturally active particles, permanently embedded in the fiber which, when you get hot, removes sweat in the vapor stage before liquid sweat forms. 37.5° is a trademark of Cocona, Inc.

COTTON

Cotton is a soft and comfortable natural material. It insulates and ventilates. One of cotton's advantages is that it does not melt when exposed to flames and sparks and that it is difficult to set fire to. Our heavy-duty cotton twill is extra sturdy and durable. This is possible because we ourselves are involved in and direct development from fibre to final production.

POLYESTER/COTTON

The combination of cotton and polyester have proven perfect for making long-lasting garments. The breathability of cotton combined with the durability and colourfastness of polyester make garments in polyester/cotton keep their shape and colour longer. Clothes in polyester/cotton are therefore an excellent choice for hard work that places great demands on both the wearer and the garments.

SPUN DYED

Using the traditional dyeing method, the finished fabric is dipped in a dye bath, before being rinsed and then dried. With the spun dyed process, the colour pigment is added before the fibre is spun and the fabric subsequently woven/knitted.

In this way the colour becomes part of the fibre. The woven/knitted fabric achieves much better colour fastness, making it better able to withstand washing, wearing, sunlight and bleaching.

In environmental terms, spun dye is much more eco-friendly than the traditional method of dyeing. As it eliminates a stage in the dyeing process, consumption of energy, chemicals and water is significantly reduced.

PRO DRY™

ProDry™ are the materials you wear closest to your skin. They transport moisture and allow it to pass to the outer layer. With ProDry™ there you don't have to have damp and cold garments next to your body.

PRO THERMAL™

Pro Thermal™ are the materials that afford effective insulation against both heat and cold. The materials detect and dispose of surplus heat at the same time that they keep out unneeded cold. Pro Thermal™ keeps body temperature at an even and pleasant level all day.

PRO VENT™

Pro Vent™ are the materials with high breathability. They let out moisture and superfluous heat. They withstand rain, snow and wind. Pro Vent™ are resilient, protective materials worn on the very outside.

PRO TEC™

Pro Tec™ are the materials that afford effective protection against exterior effects. They are very resistant to wear and to tearing. Pro Tec™ is suited to extremely strenuous work in rough environments.

SAFETY CLOTHES CREATED IN SWEDEN BUT BUILT FOR NORTH AMERICA

CSA Z96-15 ANSI 107-2020

Reflective clothing are personal protective equipment products designed to be used by a person for protection against health and safety risks.

While worksites all around the world share common environment and safety issues, high visibility protocols differ quite a lot. Europe is governed by EN ISO 20471 and previously EN 471, Canada by CSA Z96 and the United States by ANSI 107. Within North America, provincial and state governments often add their own stamps to the process.

For maximum visibility, we chose the latest 3M™ 8912 technology for the 2 inch (50 mm) wide retro-reflective silver stripes. For maximum safety, we adopted the pattern and the construction most widely used in Canada's more extreme industries – vertical reflective strips in front and a large “X” in the back, all framed with a 1 inch (25mm) contrasting fluorescent strip on either side. The logic is – if you see vertical stripes, the wearer is facing you. If you see an “X”, the wearer has his back to you.

All our garments conform to Class 2, Level 2 high visibility performance standards under CSA Z96-15 and ANSI 107-2020 Type R, Class 2. When the jacket is worn together with our high-visibility pants, they conform to Class 3, Level 2 standards.

It can be challenging to work for extended hours in wet conditions. Staying warm and dry is key to maintaining good health, staying focused and avoiding potential hazards while on the job.

ProJob rainwear is designed specifically to address these working conditions within a wet environment. No matter the conditions, the ProJob collection is built to deliver on your needs for high-visibility, reflective accents for security in low-light situations or for service and transport workers who require breathability as they are constantly on the move.

 Color: white-00, red-35, navy-58, stone-83, black-99
 Size: XS-4XL

SHIRT 2016 | P. 26

CONSTRUCTION

Primarily it is all about enhanced durability: Our construction collection takes it to new standards. Reinforced Kevlar® panels and details, Coats® Epic threads and seams that can take the daily wear and tear. It's proven through elaborate testing.

Secondly, beneath it all, we have all the regular ProJob characteristics: The functionality in terms of practical and innovative unique details like our pants' knee protection pockets that adjusts very well to movement and can be washed with the cushions still inside. Comfort meets comfort, so to speak. Stretch panels adds further mobility to the wearer.

TRANSPORT / SERVICE

Flexible and soft fabrics such as stretch and softshell, with discretely integrated vents are essential functions to take everybody working with service and transport through the workday.

For drivers, we strongly advocate the removal of unnecessary pockets like seat pockets. If they contain things it can distress the spine and the pocket seams wear cause friction on the chair/seat fabric. We provide pants with no back pockets!

If it's going to be tough, it's got to be ProJob!

WASHING INSTRUCTIONS

WASHING

All our garments are properly tested. Each of our garments has its own washing instructions, and it's important to follow these. If a garment is always washed with similar colours and at the recommended temperature, it will stay looking good for longer. "Wash separately" in the washing instructions means that the colour of the fabric may run – for these garments, which may initially have a little extra dye, it is particularly important to follow the washing instructions.

PREWASH

Use the same amount of detergent as in the main wash cycle when pre-washing very dirty clothes, but skip the prewash cycle completely for less dirty garments. Soaking garments is not recommended due to the damage which undissolved detergent can do to fabrics.

DETERGENT

Always be sure to use the correct amount of detergent – see the detergent packaging. Choose a bleach-free detergent which is suitable for the temperature of the wash.

DRYING

Only tumble dry as a last resort – if you have enough time and space, hanging garments out to dry is recommended as this is better for your clothes. Smooth out the fabric and the seams before hanging up a garment. When tumble drying, the garment should never be completely dried, as this causes unnecessary wear and can cause shrinkage.

CHOOSE SIZE CAREFULLY

Size is extremely important when it comes to work clothes – it affects function, wear and ergonomics. PROJOB clothing is designed with flexibility in mind. Clothes that are the wrong size prevent the wearer from moving around freely. Pockets and other functional details which are used repeatedly during the working day need to be positioned where they can be reached easily. If the clothing is the wrong size, either the positioning of the pockets will force the wearer to make strenuous movements, or the pockets will serve no purpose at all. It's also extremely important for the knee protectors to be in the right place to prevent unnecessary wear. The size also affects how long clothes last – the tighter the garment, the greater the strain on the seams and the fabric.

The PROJOB collection includes sizes to meet every need. Almost all our tops are available in XS–4XL and almost all our trousers are available in C44–C62, D84–D120 and C146–C156 (see Size Guide page 205 for details).

Shows the recommended wash temperature

Do not tumble dry

Do not iron

Delicate cycle

Tumble dry on low heat (50°C)

Professional leather clean

Do not use chlorine bleach

Cool iron –110°C max, suitable for nylon

Do not wring

Dry-clean, but do not use chemicals stronger than perchloroethylene

Cool iron –150°C max, suitable for polyester/cotton

Hand wash only

Do not dry-clean

Cool iron –200°C max suitable for cotton
