## **The Brand**

We founded this brand on the belief that style and determination should go hand in hand on your journey to success. Our goal is to change the way fashion is viewed by introducing our exclusive lifestyle and brand values to empower everyone.

Our products are designed and crafted to compliment all styles and occasions. We are proud to deliver a devoted customer service that not only covers any enquires but also our member's journeys. Every watch we create comes with a two-year guarantee and free shipping worldwide. You can reach us at anytime via our website or social media platforms.

## **WATER RESISTANCY**

Water resistant 10ATM: This does not cover strong water resistance such as showers or other similar water damage.

Take caution with wearing your watch where water damage may occur, water leakage/or damage caused under circumstances such as these will not be covered by the guarantee.

3ATM water resistance - The watch is resistant to everyday use and light rain.

5ATM water resistance - Cold water bath

10ATM water resistance - Swimming and snorkeling

20ATM water resistance - Deep sea diving

## **2 YEAR INTERNATIONAL WARRANTY**

Your watch is guaranteed for 24 months from the date of purchase. Should your watch develop a fault during this time, please contact the retailer or online store where the watch was purchased for information regarding repairs and warranty. **@ATOLIO VEGAS WATCHES**

If you have any problems obtaining information regarding repairs or warranty, please contact our customer service through our contact us page on our website or our social media platforms and we will be happy to assist you.

## **HOW DO QUARTZ WATCH WORKS?**

If your watch has a screw-down crown, be sure to follow the instructions above.

### **How to set the time:**

Pull the crown out to position III and turn the crown clockwise or counterclockwise until the time you want to set is displayed.

For some models with a second hand, you can set the time via an official time signal (radio/television/internet). The seconds hand stops when the crown is pulled out to position III. Once the time is synchronized, push the crown back to position I (on models with a screw-down crown, also screw the crown in).

### **NOTED:**

Do not perform quick date adjustment between 22:00 and 02:00. Pull the crown out to position II and turn it clockwise until the desired date is displayed. To adjust the day of the week, turn it counterclockwise. While you do this, your watch continues to work as normal, so you don't have to set the time.

**TEMPERATURE:**

Do not subject your watch to sudden changes in temperature (submersion in cold water and then exposure to sunlight) or to extreme temperatures above 60 ° C (140 ° F) and below 0 ° C (32 ° F).

**MAGNETIC FIELD:**

Do not expose your watch to strong magnetic fields, such as those produced by speakers, cell phones, computers, refrigerators or other electromagnetic devices.

**HOW TO WIND UP AN AUTOMATIC WATCH?**

1 - Take off your watch and hold it in your hand to be able to wind it with the other. Never wind your watch while wearing it, as this exerts a force on the winding stem and crown. The inner tube of the crown is a delicate part and you could easily bend it.

2 - Turn the crown clockwise. Make sure the crown is pushed in, i.e. in the "neutral position", i.e. as close as possible to the case of your watch.

3 - Winding is complete when the crown locks in place. Do not try to wind it any further, as this could damage your watch. About ten turns are enough to wind an automatic watch, which will then recharge itself fully when you wear it.

Your guarantee does not cover the following:

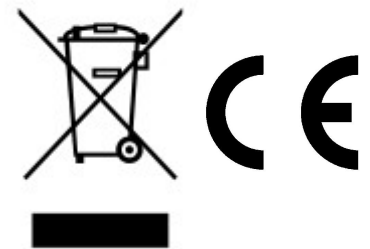

1. Batteries, straps or bracelets.
2. Damage caused from accidents, or mishandling to any part of the watch, including strap buckles, bracelets and watch glass.
3. Water penetration, except in watches marked as water resistant. (check water resistant information part of manual)
4. Tarnishing of the watch bracelet or case.

The terms of this guarantee provide rights that are in addition to your statutory rights and do not affect your statutory rights.

## **DIPOSAL OF ELECTRICAL AND ELECTRONIC EQUIPMENT**

The consumer has a significant role to play in reducing the impact of waste electrical and electronic equipment, batteries and accumulators on the environment, through re-using or recycling such articles. Some batteries and accumulators and some of the components used in substances that can damage the environment, present a risk to human health if not properly disposed of.

The crossed out wheelie bin symbol is to remind you that waste electrical and electronic products, batteries and accumulators should not be disposed of with household waste.

If you are unable to reuse or recycle your article, it should be disposed of at a civic amenity site or a local authority recycling facility.
