

# Opalescent Glazes over Velvet Underglazes

Low Fire  
Layering

O-23 Sapphire Blue  
over V-343 Chartreuse

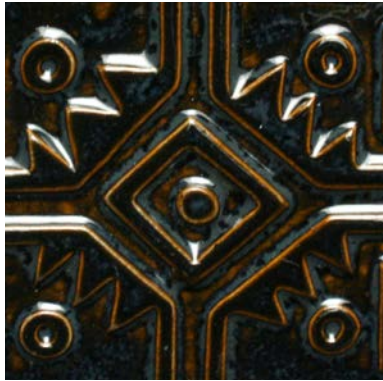

America's Most Trusted Glazes™

# Application Notes

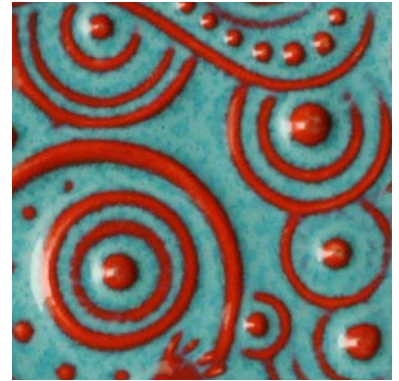

Opalescent glazes are soft, high gloss, low fire float glazes that are formulated to flow and pool in texture. Layer them over a complementary or contrasting underglaze color for an easy way to create a dramatic color effect.

Apply one coat of AMACO® Velvet or LUG underglaze to any Cone 04 bisque fired form that has surface texture. Then apply three coats of an Opalescent glaze. (Allow each coat to dry.)  
Glaze fire to Cone 05.

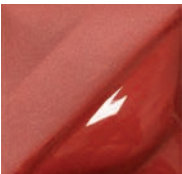

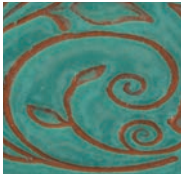

(These test tiles were made using AMACO® Textured Slab Molds.)

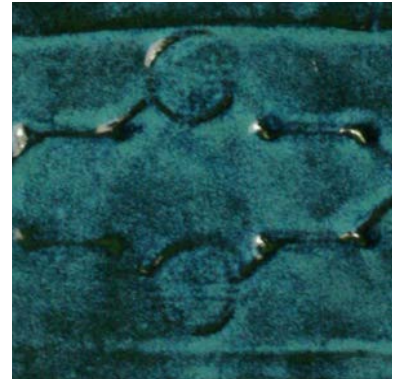

O-2 Black Tulip over  
V-390 Bright Orange
