

Formulate 8ft Cylinder Tower 03

Combining the latest developments in fabric printed technology and aluminum tube frames, the 8ft Fabric Cylinder Tower 03, adds decor and sculpture to any event, stage set, trade show booth or interior space. Both the top and bottom have diameters of 3ft, allowing the Cylinder Tower 03 to make a dramatic visual impact without taking up valuable floor space. Optional internal LED lighting (sold separately) creates a stylish, eye-catching glowing effect. Cylinder Tower 03 packs easily into a wheeled OCL case for easy storage and transport.

features and benefits:

- State-of-the-art 30mm aluminum tube frame with snap button assembly
- Easy to store and ship
- Quick to set up
- Kit includes: one frame and one wheeled molded OCL storage case
- Lifetime hardware warranty against manufacturer defects

Connection Methods

Formulate® structures use a number of different yet simple connection methods. Your kit will include one or more of the connection methods shown below. Steps within the Kit Assembly will reference a specific method for each connection point.

Connection Method 1: ES30 / ES50 / ES75

Compress the unlocked connector and slide one tube onto each end. Lock both screws carefully using your allen key tool. Be sure to lock securely, but do not overtighten.

Connection Method 2: Snap Buttons & Swage

Locate the snap button on the connector or swage tube. Locate the hole on the corresponding tube. Press the snap button with your thumb and slide the tube and connector together so that the snap button snaps fully into the lock hole. To disassemble, press the snap button and pull apart.

Connection Method 3: ES30-90B / ES30-I / ES30-C

Compress one unlocked end of the connector and slide it through one tube end. Compress the other end of the connector and slide on the second tube. Lock both screws carefully using your allen key tool. Be sure to lock securely, but do not overtighten.

Connection Method 4: Tube Clamps

Be sure to fully assemble all frames before using clamps. With the clamp unlocked, place one tube of the first frame into the mouth of the clamp. Place the second tube (if applicable) into the second mouth of the clamp. With both frame's tubes in the clamp, be sure to lock securely, but do not overtighten.

Kit Assembly

Step by Step

Step 1.

Gather the components necessary for assembling the bottom ring and first section of uprights. Use the exploded and labeling diagrams for component layouts. Reference connection method 2 for more details.

Step 2.

Gather the components necessary for assembling the second section of uprights. Use the exploded and labeling diagrams for component layouts. Reference connection method 2 for more details.

Step 3.

Gather the components necessary for assembling the top ring. Use the exploded and labeling diagrams for component layouts. Reference connection method 2 for more details.

Step 4.

Apply the pillowcase fabric graphic from over the top ring and pulling down to the base ring. Close the zipper located at the bottom ring.
