Cabinet

Frame A and Cabinet stand independently of one another, no connection hardware required.

Connection Methods

Connection Method 1: ES30 / ES50 / SNAP BUTTONS

For spigot connections, compress the unlocked connector and slide into the tube lock access hole. Lock both screws carefully using your allen key tool. Be sure to lock securely, but do not over tighten. For snap button connections, locate the snap button on the connector or swage tube. Locate the hole on the corresponding tube. Press the snap button with your thumb and slide the tube and connector together so that the snap button snaps fully into the lock hole. To disassemble, press the snap button and pull apart.

Connection Method 4: CAM LOCK

First, with the cam lock disengaged, place the cam lock teeth into the extrusion channel. Second, use the allen key tool to lock it in place. Make half turns clock-wise to engage the cam lock. Do not over tighten the lock buttons.

Kit Assembly

Step by Step

Step 1.

Gather the components to build the frame. Use the Exploded View and the Labeling Diagram for part labels.

Reference Connection Method(s) 1 for more details.

Step 2.

With the frame laid out flat on the floor, apply the pillowcase over the frame and zipper it closed at the bottom.

Step 3.

Gather the components and provided allen key tool to stabilize the frame. Use the Exploded View and the Labeling Diagram for part labels.

Reference Connection Method(s) 2 for more details.

Step 4.

Gather the components for attaching the monitor mount bracket onto the frame.

Reference the monitor mount supplement sheets for more details.

Kit Assembly

Step by Step

Step 5.

Gather the components to attach the sides of the cabinet and the extrusion to the base. Use the Exploded View for labels.

Reference Connection Method(s) 2 for more details.

Step 6.

Using the provided handtool, attach the remaining panels as shown in the diagram to the right. Use the Exploded View and the Labeling Diagram for part labels.

Reference Connection Method(s) 2 for more details.

Step 7.

Open the left panel cabinet door to access and attach the counter top from the inside. Use the Exploded View and the Labeling Diagram for part labels.

Reference Connection Method(s) 2 for more details.

Step 8.

Attach your monitor display onto the monitor bracket and simply move your counter in front of the frame.

Setup is complete.
