

LINEAR PRO 10X20 KIT 26

Linear Pro Modular Backwall Kit 26 provides a modern, slick and stylish appearance. The extrusion based inline exhibit features Velcro applied fabric center graphics, UV printed headers and wings, as well as two pillowcase fabric canopies. Four tables provide additional space for products or messaging and are available in four color options. Four 50 watt spotlights provide illumination to messaging. Kit includes four OCH shipping cases.

We are continually improving and modifying our product range and reserve the right to vary the specifications without prior notice. All dimensions and weights quoted are approximate and we accept no responsibility for variance. E&OE. See Graphic Templates for graphic bleed specifications.

PHFC2-150-L	x4	150MM PHFC2 W/ONE LOCK
LUM-LED-ORL-7	x4	LUMINA LED LIGHT
HEX KEY SET	x2	ALLEN KEY MULTI-TOOL (HEX KEY TOOL)

ASSEMBLY

Have a Question?

Please contact support@tradeshowplus.com

Step 1. Assemble the bottom of the frame

Using the 5MM HEX KEY, attach each PH-1168-L-L and both sides of the PH-567-L-L to the LN-FS-UPRIGHT's with the hook and loop fastener facing front. Attach the opposite ends of the PH-1168-L-Ls to the PH-1067-L1 uprights using the 5MM HEX KEY. Once all are attached, use the 5MM HEX KEY to depress the IB2 lower button and insert into the top of the PH-1067-L1s, DO NOT LOCK.

Step 2. Assemble the top of the frame

Make sure the hook and loop fastener is facing towards the front and slide the left and right PM3O-1067s onto the LN-FS-UPRIGHT on the left and right ends of the frame. Push in the lock button to slide and attach the two PH-1067-L1s to the IB2s below, then lock both buttons. Attach PH-1168-L-Ls and the PH-567-L-L to the PM3O-1067s and PH-1067-L1s using the 5MM HEX KEY.

ASSEMBLY

Have a Question?

Step 3. Attach graphic support & adhere PANEL CLAMP for graphic headers/wings

Snap attach the WME-1000 (graphic support) onto the frame inside the left and right uprights of the left, center, and right frame sections. Make sure the hook and loop fastener is facing towards the front. Insert the 20 PANEL CLAMP into the outside perimeter channels and turn clockwise to lock, other locking screws should be loose. Evenly space out the standoffs for each header or wing.

PANEL CLAMP ATTACHMENT

Step 4. Attach graphic headers/wings, right and left graphic, and center graphic
Screw the PANEL CLAMP clockwise into channel until it is tight. Loosen the THUMBSCREW, place rigid sintra panel graphic and tighten in place. hook and loop fastener attach the LN-10X10-FG (left & right large fabric graphics) and the LN-C-FG (center fabric graphic) to the frame starting at the top left corner. Continue to hook and loop fastener attach the graphics to the frame ending in the bottom right corner.

Step 5. Attach c-shaped canopies

Assemble each frame in order using the number key to attach the tubes and hubs. Pull over the pillowcase and insert the screws through frame parts 1, 7, and the pillowcase slots. Loosely fasten canopy post mounts to screws, DO NOT ZIPPER. Last, slide the post mounts onto the frame and tighten using the 8MM HEX KEY, then zipper the pillowcase. Repeat for the second canopy.

Step 6. Assemble lights & tables & attach to backwall

Slide the light fixture LUM-LED-ORL-7 onto the light clip. Lift and rest light clip onto top of horizontal channel and run the wires in between and behind the panels. Slide the PHFC2-150-L into the underside of the table. Fasten the table legs to the underside of the table top using the THUMB SCREWS. Once finished turn table over and attach it to the backwall frame (LN-FS-UPRIGHT) using the 5MM HEX KEY on the PHFC2-150-L. Repeat for all of the other table.
