

Linear Pro Double Reception Counter

The Linear Pro Reception Counter combines durable, lightweight extrusion with printed graphic panels. Features two rectangular counters connected with an arching counter top, locking storage cabinets and internal shelving. Kit includes counter hardware with printed graphics and OCH2 shipping case.

features and benefits:

- Custom appearance
- Easy to assemble
- Table top available in four finishes
- Locking door
- Internal shelf
- Installation tool included
- Aluminum frame construction
- Custom top and graphic colors available
- Lifetime limited hardware warranty against manufacturer defects

Connection Methods

Connection Method 1: P90R / PH-L

First, with the cam lock disengaged, place the cam lock teeth into the extrusion channel. Second, use the allen key tool to lock it in place. Make half turns clock-wise to engage the cam lock. Do not over tighten the lock buttons.

Connection Method 2: ROTO LOCKS

First, with the provided hand tool, disengage the male ROTO LOCKS. Second, use the doll rods to help align the wood panels in place. Third, with the provided hand tool, engage the male ROTO LOCKS into the female receptors with snug 3/4 turns.

Connection Method 3: SS1-1

First, take the shelf support and loosen the set screw to about a 1/4 inch gap. Do not remove it. Second, slide the shelf support into the 3mm center channel. Turn the shelf support clock wise to lock it in place. Third, rest the shelf onto the shelf support. Loosen the shelf support to adjust and level.

Kit Assembly

Step by Step

Step 1.

Locate your V-CAB-01-DR and V-CAB-01-FR assemblies. Both frames should have preinstalled graphics. V-CAB-01-DR should also have a locking door, test to ensure it is properly functioning.

Reference Connection Method 1 for more details.

Step 2.

Locate (2) PH-280-S-S extrusions. Lock into place so that the hex bolt heads face inward to the cabinet and the extrusion is flush with the V-CAB-01-DR and V-CAB-01-FR.

Reference Connection Method 1 for more details.

Step 3.

Locate (2) PH-280-S-S extrusions and cabinet side graphic panels. Slide your graphic into the channels of V-CAB-01-FR and V-CAB-01-DR. Next, lock your PH-280-S-S extrusions above the graphics.

Reference Connection Method 1 for more details.

Step 4.

Measure from the top of your cabinet to where you would like your internal shelf support. Lock the SS1 shelf supports into the channels of your V-CAB-01-FR and V-CAB-01-DR. Accurately measuring will ensure the internal shelf sits level.

Repeat steps 1-4 to make the second cabinet.

Reference Connection Method 3 for more details.

Kit Assembly

Step by Step

Step 5.

Locate counter top V-CU-CT-02. Note the imprinted placement templates on the underside of your counter top. Set the counter top onto the assembled counters. Make sure the counter sets into the imprints on the underside of the counter top.

Reference Connection Method 2 for more details.
