

Vector Frame Counter 06

Vector Frame counters compliment the Vector Frame series of exhibit kits, but are also ideal for any stand-alone event or display. Vector Frame counters couple simple extrusion-based frames with flexible PVC graphics. Tables are available in four colored finishes. Custom sizes also available.

features and benefits:

- Features flexible PVC graphics and simple extrusion based frames
- Locking door
- Choose from four tabletop finishes
- Easy step-by-step instructions

- Includes a molded portable shipping case
- Lifetime limited warranty against manufacturer defects

Kit Assembly

Step by Step

Step 1.

Gather (2) PM2R8-100 extrusions and (1) PH-2R-L-L-IN. Lock together so that the top of the PH-2R-L-L-IN is flush with the top of the PM2R8-100s.

Please reference Connection Method 1 for more details.

Step 2.

Locate (2) PM2R8-100 and (1) VFC-06-DR. Lock the door to the PM2R8-100s so that the top of the door assembly is flush with the top of your PM2R8-100s.

Please reference Connection Method 1 for more details.

Step 3.

Combine Step 1 and Step 2 assemblies by adding (2) PH-300-S-S. Remember to lock the extrusions with the lock holes facing into the cabinet.

Please reference Connection Method 1 for more details.

Step 4.

Locate (4) CAM LOCKS. Lock each CAM LOCK into the corners of your VFC-06 assembly. Measure so that the bottom of the CAM LOCKS are flush to the bottom of the door assembly.

Please reference Connection Method 1 for more details.

Kit Assembly

Step by Step

Step 5.

Apply your VFC-06-INT-SHLF internal shelf. Allow the shelf to rest on the installed CAM LOCKS.

Step 6.

Slide your graphics up the sides of the cabinet until they rest against the top extrusions.

Step 7.

Add your second layer of extrusions to the bottom of the cabinet. You will need (2) PH-300-S-S, (1) PH-2R-L-L-IN, and (1) PH-415-L. Lock the PH-415-L to the center of the PH-2R-L-L-IN in its downward facing channel to create a 5th leg.

Please reference Connection Method 1 for more details.

Step 8.

Place your VFC-06-CT on top of your unit. Add the remaining plastic caps to the bottom of each extrusion touching the ground.

Setup is complete.

Connection Methods

Connection Method 1: CAM LOCK

First, with the cam lock disengaged, place the cam lock teeth into the extrusion channel. Second, use the allen key tool to lock it in place. Make half turns clock-wise to engage the cam lock. Do not over tighten the lock buttons.
