

Set Up Instructions

Wavelight 5ft Tabletop Backlit Display

Step 1: Connect poles by pressing and pushing together, then connect corner sections to straight sections with matching shape symbols.

Step 2: Take out the LED Lights and **gently** unroll on the ground with lights face down. **WARNING! Do not drag lights across ground or it could break the LED lights.**

Step 3: Attach each LED Light Array to top and bottom of frame.

Pull extra cable leash at bottom to secure each LED Light Array into place.

Step 4: Unzip print and lay image face down. Slide print onto the frame like a pillow case.

Step 5: Unzip pocket on black fabric for more stretch. Pull graphic over bottom edge and pinch zipper to together to zip closed.

Step 6: Connect the feet by inserting into the bottom holes of frame and pressing firmly. Lift frame into upright position.

Step 7: Find cable ends and pull through grommet holes. Connect each power cable to a power supply. **WARNING! Only connect one light array to each power supply.**

Step 8: Collect cables together and close zipper. Plug power supply into electrical unit and turn on to complete.
