

approx. 9.8"  
between grommets

## Outdoor Banners: Wind Dancer LT (Double Sided)

Short Graphic:

Total Graphic Area: 35.5"w X 66"h

Total Visual Area: 31.5"w X up to 58"h

Please be sure to keep all text, logos, critical design elements out of the grommet area (see gray area on template)

Graphics printed on 4oz. Flag using the dye-sublimation printing process will need an extra 2" bleed on left and right and 4" bleed on top and bottom.

Double sided flag graphics will be printed on two pieces of flag and sewn together with an opaque liner.

### General Art Guidelines:

- CMYK Color Mode
- All Solid Coated Pantone colors should be called out in the art as spot colors
- Embed all images and support files
- Resolution must be 100-120 ppi
- All fonts must be created to outlines
- Do not scale artboard
- Background color/images must bleed to the edge of artboard
- Do not use spot colors from template in your artwork as they will not print

## SHORT VERSION, FRONT

please keep type, logos, critical design elements off the gray area. This is where the grommets will be placed

approx. 18.75"

The diagram shows a vertical rectangular document back cover. At the top, there is a gray horizontal band containing four black circular grommets. A horizontal line is drawn below the top grommet, with the text 'approx. 9.8" between grommets' centered below it. On the right side, there is a gray vertical band containing three black circular grommets. A vertical line is drawn to the left of this band, with the text 'approx. 18.75"' centered next to it. The entire document area is enclosed in a dashed black border. At the bottom, the text 'SHORT VERSION, BACK' is centered. Below it, a paragraph of text explains that design elements should be kept off the gray grommet areas. In the bottom left corner, a legend identifies the dashed border as the 'bleed area' and a solid line as the 'trim line'.
