What is ?????????????????????? Myostatin (also known as growth differentiation factor 8, abbreviated GDF-8) is a myokine, a protein produced and released by myocytes that acts on muscle cells' autocrine function to inhibit myogenesis: muscle cell growth and differentiation. Myostatin is an endogenous hormone meaning it naturally occurs within our bodies. Myostatin's primary purpose is to ensure muscles like your heart and stomach do not grow beyond genetic preset limits.? [see here now](#)
