2. Download APP

1 Search and download the "WasTrans" app in the App Store/ Google Play. You may also scan the QR code to download.

App Store

Google Play

2 Open the app and allow the permissions for the proper use of the device.

3 After downloading the APP, you need to register with your email address before you can use it.

3. Turn ON / OFF

1 Take the earphones out of the charging box, and the earphones will turn on automatically. At this point, you will hear the voice prompt "Pairing" from the headset, waiting for the Bluetooth connection. After the headset is placed in the charging box, it will automatically shut down.

4. Bluetooth Pairing

1 Open the WasTrans App and select M9 .

2 Turn on Bluetooth and select " WAS- M9 " to pair . After the connection is successful, you will hear the "Connected" prompt from the earbud, and the interface will display that the device is connected.

Note : If the earbud has been paired with the mobile phone, it will try to automatically reconnect to the device the next time the earbud is turned on.

5. Translation

According to different application scenarios, you can choose the following five different modes: touch mode, speaker mode, free talk mode , offline mode and photo Translation

Touch mode

Two people each wear one earbud, click the earbud to translate in real time. Suitable for acquaintances who are willing to wear your earbud

1) Select the touch mode on the main interface;

2) Give one of the earbuds to the other party;

3) Select the language of the left and right earbuds;

4) Tap one side of the earbuds to speak continuously, and both earbuds can hear simultaneous interpretation. If the other side wants to speak, tap his or her earbud to start speaking. To end the translations, just touch the earbud again.

Speaker mode

One person wears earbuds and the other holds a mobile phone, which is suitable for strangers who are inconvenient to wear your earbuds

1) On the main interface, select "Speaker Mode" ;

2) Select the language for the earbud and the phone;

3) Tap the earbuds (or click the lower half of the phone screen) to start speaking, the mobile phone speaker will play the translations; Tap the top half of the phone screen, the other person starts speaking to the phone, and you will hear the translations through the earbuds.

Free talk mode

Both wear an earbud to translate in real time, release their hands, and communicate freely

1) "Free Talk Mode" on the main interface ;

2) Hand over one of the earbuds to the other party;

3) Select the language of the left and right earbuds;

4) Click the mobile APP to start a conversation. In this mode, there is no need to touch the earbuds. During the conversation, both earbuds will hear the translated content in real time. After the conversation is over, click the button at the bottom of the mobile APP or tap the earbud to end the translation.

Offline translation

Offline translation means that you can use translation function without Internet, such as at airplanes and underground garages

Operation method:

Internet connected

1) Click the icon [Ⓜ] in the upper right corner of the home page, select "Offline Management" , and click "Redeem&Download";

2) Select the language you want to download and download it now;

6. Setting function in APP

[Volume adjustment] Adjust the volume of the playing sound

[Choose automatic/manual end pickup]

①Automatically end pickup: According to the speaking interval (2-3s), the earbud automatically ends the pickup

②Manually end pickup: You need to touch the back of the earbud to end pickup

[Rotate the upper half of the screen] In the external playback mode and offline mode, you can choose to rotate the upper half of the translation interface by 180 degrees, so that the other party can view the translation results conveniently

[Adjust font size] Adjust the font size of APP text

[Prompt opening and closing] Open/close the instruction pop-up window after opening the APP
