AIRBELT K2 Kombi, K2 Turbo, and K3 Premium

The three AIRBELT K models are powerful, ultra-quiet, mid-size canister vacuum cleaners that feature three on-board attachments, a large .8-gallon bag, a generous 25-foot cord and 37-foot cleaning radius, protective rubber-coated wheels, a durable telescopic tube with quick-release connections, and a full bag or clog indicator. They also feature excellent filtration, a tug-and-retract cord rewinder, and a soft-foam bumper that protects the vacuum, furniture, and walls from scuffs and scratches.

The K series offers two straight-suction models that provide a choice of cleaning heads. The AIRBELT K2 Kombi includes a combination nozzle with retractable bristles for use on rugs and hard floors, while the AIRBELT K2 Turbo includes an air-driven turbo head for rugs and a parquet brush for hard floors. Both models have a suction-control knob that is located on the canister body.

The AIRBELT K3 Premium offers much more! In addition to a parquet brush, it includes the commercial-quality ET-1 electric power head that cleans both carpets and hard floors, has excellent pet hair removal, and the extension side of its L-shaped contour makes cleaning under counters easy. The power head also offers a super-low 3.5-inch horizontal cleaning profile, tool-free brush roller removal, and automatic shut off due to brush roller obstructions. Foremost among its many features, the K3's dual-control handle provides unsurpassed user convenience with an integrated on/off switch for the brush roller, a slider switch that adjusts suction power, and it facilitates effortless control of the power head's 180° steering ability.

Canister
Value Pack
#1996PK

Flat-to-the-floor, 3.5-inch Profile – A low, cleaning-head profile makes reaching under furniture and beds easy!

Mid-size Canister Vacuum with Large Filter Bag – The K models are considered mid-size canister vacuums, which mean they are smaller, more compact machines. They have a .8-gallon filter bag and weigh about four pounds less than SEBO's D-model canisters.

Three On-board Tools – The K canisters come with a full-size crevice tool and dusting brush, and a mid-size upholstery nozzle. Also, many optional attachments are available that can be fitted to the telescopic tube or the hose handle.

Three-step Filtration – They feature an S-class pre-motor microfilter, a three-layer AeraPure™ bag, an exhaust filter, and a tightly sealed casing, which prevents dirty air from escaping through its seams. An optional HEPA pre-motor microfilter is also available.

with Combination Nozzle
#9679AM

Long, 25-foot Power Cord and 37-foot Operating Range – Its cleaning radius saves time because it can clean large areas without changing electrical outlets. Plus, the seven-foot suction hose provides superb user maneuverability.

Convenient Parking and Storage Aids – The suction hose and telescopic tube, when connected to the parquet brush or combination nozzle, can be firmly stored on the canister’s underside or backside housing.

Tug-and-Retract Cord Rewinder – The K models offer a “tug-and-retract” cord rewriter, instead of a push-button rewriter, which is the type offered on the AIRBELT D and E models.

Soft-start Feature – The vacuum’s gradual power-up capability extends motor life.

Full Bag or Clog Light – When a full bag, a clog in the airflow pathway, or an excessively dirty microfilter is detected, an orange warning light located on the canister body illuminates and an airflow bypass valve opens. This feature prevents overheating and motor damage from a lack of adequate airflow.

Three Protective, Rubber-coated Wheels – The castor wheels glide easily and gently over all floor types, providing exceptional maneuverability and protection of floor surfaces.

Patented AIRBELT Bumper – The textile-covered, soft-foam bumper protects furniture, walls, and the vacuum itself from incurring scratches and scuffs during use. It also diffuses exhaust air, which contributes to its ultra-quiet performance.

AIRBELT K3 Premium

Durable Power Head with Manual Height Adjustment and Amazing Steering Ability – The K3 model comes standard with the commercial-grade ET-1 electric power head, which is 12 inches wide, effectively cleans both carpets and hard floors, easily removes pet hair, offers four-level manual brush height adjustment, and its 180° steering ability provides amazing maneuverability.

Easy Brush Roller Removal, User Warning Lights, and Automatic Obstruction Shut Off – The ET-1 power head has easy, tool-free brush roller removal, a handy clog removal door, and a red warning light with automatic shut off if the brush roller is jammed or obstructed. Also, its warning light remains illuminated during use, when brush height is set too high for optimal cleaning, or when the brush roller should be replaced due to excessively worn bristles.

Dual-control Handle with Suction-power Adjustment and Brush Roller On/Off Switch –

The K3’s extraordinary dual-control handle has a slider switch that provides convenient suction adjustment, from maximum power for normal cleaning to minimal suction for delicate tasks, such as curtains. The hose handle also offers an on/off switch for the power head’s brush roller when straight suction is required, such as cleaning fine rugs.

AIRBELT K2 Kombi and K2 Turbo

The K2 Kombi and K2 Turbo models are both straight-suction vacuums, so they differ from the K3 as follows:

Turbo Head and Parquet Brush, or Kombi Nozzle, but No Power Head – The K2s have telescopic tubes and suction hoses without integrated power cords, so they do not accommodate electric power heads. The K2 Turbo comes with an air-driven turbo head and parquet brush, but the K2 Kombi comes with a combination nozzle with retractable bristles. Both models clean hard floors and rugs.

Suction-control Knob on Canister Body – Because the K2 models have hoses and telescopic tubes without power cords, their suction-control knobs are located on their canister bodies, not the handles.

STANDARD FEATURES OF SEBO VACUUM CLEANERS

Designed and Manufactured in Germany – Legendary quality, reliability and performance make SEBO vacuums the first choice of cleaning professionals throughout the world.

World's Best Pet Vacuums – Because of superior power head and brush-roller technology, SEBO vacuums are the world's best for pet hair removal!

Reliable, Commercial-grade Components – All SEBO vacuums are constructed with thick, reinforced, ABS plastic, aluminum and metal parts, steel axles and bearings, and high-end, quality motors. Therefore, SEBO users own reliable, long-lasting vacuum cleaners. Competing vacuums are made with thin, flimsy, inexpensive, plastic materials, none of which are reinforced, and typically have useful lifespans of one or two years.

Rubber Wheels and Soft Bumpers Protect Homes –

Smooth-gliding, rubber wheels protect hard floors and provide exceptional maneuverability. In addition, the bumpers that surround the power heads and the soft AIRBELT bumpers that surround SEBO's canisters protect furniture, walls, and vacuum housings from incurring scuffs and scratches during use.

Advanced, Brush-roller Technology – SEBO's brush rollers are uniquely designed to funnel hair and debris into the power head's airflow channel, which improves vacuum cleaning performance on all flooring surfaces.

Save Money! SEBO Vacuums Last for Years and Extend Carpet Life! – If properly maintained, SEBO vacuums save ordinary, residential users hundreds of dollars, by providing excellent performance for ten to fifteen years or more, and their deep-cleaning, power-brush technology extends the life of carpets. Typical vacuums perform poorly, even when new, and usually do not last beyond two years. So six or seven "disposable vacuums" must be purchased during the average life expectancy of just one SEBO machine.

Changing Bags is Easy and Clean – SEBO filter bags can be changed in just a few seconds, and a hygiene cap keeps dust sealed inside during removal and disposal.

Bagged vs. Bagless . . . Bags are Better! – Top-fill, three-layer AeraPure™ Bags are an integral part of SEBO's filtration system because they hold virtually all the dirt captured by the vacuum, which improves the effectiveness and useful life of the microfilters.

THE ONYX COLLECTION PROMOTES SEBO'S FREE WARRANTY BONUS!

All SEBO vacuum-cleaner models offer standard warranty coverage of seven years on motors and five years on non-wear parts and labor charges. However, the purpose of the Onyx Collection is to promote SEBO's FREE WARRANTY BONUS that extends factory warranty coverage to a total of ten-years motor, ten-years non-wear parts, and seven-years labor!

Onyx Collection vacuum cleaners are sold exclusively in-store by SEBO's "Authorized Dealers," but never online. The reason for the Collection's in-store exclusivity is to ensure that buyers have on-site dealer assistance with their Bonus Registrations. Using a dealer-supplied code and the store's name and address, buyers obtain their extended warranty coverage by completing a simple online registration, located at www.sebo.us. Immediately thereafter, new 10/10/7 Warranty Certificates are sent to buyers via e-mail.

The WARRANTY BONUS can be applied to all SEBO vacuum cleaner models of any color, not just the Onyx Collection units (power heads sold separately are excluded).

PLEASE NOTE: The FREE WARRANTY BONUS does NOT apply to SEBO vacuum cleaners purchased from "Third-party Websites," such as Amazon and Walmart.com, because they have many UNAUTHORIZED SELLERS with false, hidden, or disguised identities, which means they have no access to genuine replacement parts, factory-trained technicians, and labor-cost reimbursements!
