UV-C

STERILIZATION

High-Quality Drinking Water

Smart UV Bottle is the smart self-cleaning water bottle and water purification system. with UV sterilization. It uses UV technology to eliminate up to 99%* of bio-contaminants such as E. coli from your water and bottle.

While you wait, gently shake the bottle a gentle shake or do your best water dance to spread the UV light evenly.

The Bottle lid has built-in UV lamp beads that which only illuminate when the bottle lid is vertical. When the Bottle lid is tilted, the UV light stops and does not harm the human body.

The smart water bottle has a waterproof LCD display, IPX-7 waterproof, Press the top of the thermos gently, Sensitive capacity touch-cover can show the temperature of water inside the thermos instantly, which can avoid the embarrassment of burning you.

S1 Pro UV Bottle

S1 Pro is the smart self-cleaning water bottle and water purification system. with UV sterilization. The smart water bottle has a waterproof LCD display, IPX-7 waterproof, Press the top of the thermos softly, Sensitive capacity touch-cover can show the temperature of water inside the thermos immediately that can avoid the embarrassment of burning you.

UV sterilization

It uses UV technology to eliminate up to 99%* of bio-contaminants such as E. coli from your water and bottle.

Keep It Cool(or Hot) & Portable

Your cold drink will stay perfectly chilled up to 24 hours or your coffee or tea will keep hot for up to 24 hours.

TDS

WATER QUALITY DETECTION

The TDS value represents the concentration of total dissolved solids in water in milligrams per litre (mg/L). It mainly reflects the concentration of calcium (Ca²⁺), magnesium (Mg²⁺), sodium (Na⁺), potassium (K⁺) and other ions in the water. The smaller the TDS value, the lower the concentration of these ions in the water, and the smaller the electrical conductivity. The TDS value is usually used to measure the purity of purified water, and the size of the TDS value reflects the size of the concentration of the majority of hazardous heavy metal ions in the water.

The smart water bottle has a waterproof LCD display, IPX-7 waterproof, Press the top of the thermos softly, Sensitive capacity touch-cover can show the temperature of water inside the thermos immediately that can avoid the embarrassment of burning you.

TDS VALUE (PPM) REFERENCE

TDS value (ppm)	Water quality
0-50	Highest purity
50-100	High purity
100-300	Average purity
300-600	Scale will form
600-1000	Poor taste

*X ppm: 1 liter of water contains X milligrams of dissolved solids

* TDS value represents the total soluble total solids content of water, can reflect the water quality to a certain extent, usually the lower the TDS value, indicating that the water has less heavy metal ions and other soluble salts, the purer the water quality.

*TDS detection is not applicable to drinks, coffee, tea and other beverages.

R1 TDS Bottle

Industry innovation TDS water quality detection patented technology. The smart water bottle has a waterproof LCD display, IPX-7 waterproof, Press the top of the thermos softly, Sensitive capacity touch-cover can show the temperature of water inside the thermos immediately that can avoid the embarrassment of burning you.

TDS water quality detection

High-Quality Drinking Water, Monitor total soluble solids content in water.

Custom Capabilities

Single Color Pad Print

Direct single color pad prints use the Pantone color system and apply the ink via an offset printing process to transfer the ink from an etched plate to the mug surface.

Multi Color Pad Print

Direct multi color pad prints use the Pantone color system and apply the inks via an offset printing process to transfer the inks from an etched plate to the mug surface.

Laser Engraving

Laser Etching vaporizes the material from the surface of the mug, revealing the stainless-steel underneath leaving a sleek and high quality finished logo.
