CLASS XII COURSE CONTENT

Book- Fundamental of Human Geography

Chapter No. and Name	Specific Learning Objectives	Suggested Teaching Learning Process	Learning Outcomes
1 Human Geog- raphy	 To define Human Ge- ography and describe the nature and scope of Human Geography as a discipline. 	 Case Study on determinism and possibilism given in NCERT to be used to explain the concept. Prepare a concept map of the chapter explaining the following: Definition of Human Geography, nature, scope, schools of thought, branches of Human Geography. 	 At the completion of this unit students will be able to: Define the term human geography Elucidate the Interdependence between Nature and Human beings. State the fields and subfields of Human Geography and its relation with other branches of Social Sciences. Differentiate between Environmental Determinism and Possibilism. Explain Neo-determinism with examples from real life.

			I
2 The World Population- distribution, density and growth	 To familiarize learners with some basic concepts of Population Geography. To understand the patterns of popula- tion distribution in the world and correlate the factors influencing popula- tion distribution. 	 On a world map mark and label ten most populous countries of the world. Class discussion on how science and technology helped in population growth. List the reasons for human migration. On the world map identify the countries of Europe and Asia with negative growth rate of population and African countries with growth rate of popula- tion more than three 	 At the completion of this unit students will be able to: Calculate density of population, birth rate and death rate. Name and define the components responsible for population change. Understand the stages of population growth in the world using Demographic Transition Theory. Suggest measures the provide manual providement of the providement of th
		 Students can be asked to find out the density of population of their respective state/ district/ city. Case Study on Thomas Malthus (optional) Prepare a glossary 	 to control popula- tion growth. Define the following terms: Growth of population, Natural growth of popula- tion, Positive growth of population, Negative growth of population
3 Human develop- ment	 To understand the concept human devel- opment introduced by Dr. Mehbub UI Haq and Prof. Amartya Sen. 	 The lesson can be introduced by asking students to discuss with their peer group What is a meaningful life? Discuss with your peer how Beti Bachao and Beti padhao programme introduced by the Government of India can address the issue of declining sex ratio and make life more meaningful for girls. Enact a play to show how choices get limited due to lack of capability in areas of income, health care and education. Interview a lady vegetable vendor, cobbler and a sweeper in the community and note how their opportunities were limited because of gender, caste and income. 	 At the completion of this unit students will be able to: Differentiate between growth and development Explain the three basic indicators of human development and measure the level of Human Development. Describe Human Development Index published by UNDP. Compare HDI with Human Poverty Index. Explain the key pillars of human development and measuret with examples. Compare Income approach, Welfare approach, Basic Needs approach and capability approach to understand the concept Human Development. To categories countries on the basis of their HDI and explain their characteristics.

4	To understand various	Class discussion:	At the completion of this

			of Kolkhoz
			introduced in
			the erstwhile USSR boost
			agricultural
			production.
			• Examine the reasons for success of coop-
			erative farming in the
			European countries.
			Differentiate between open cast mining and
			shaft mining.
			 Discuss how min-
			ing can have impact on humans and
			environment.

5 Secondary Activities	 To develop understanding of secondary activities with emphasis on manufacturing industries. To give an overview of manufacturing processes, types, its significance and recent changes. 	 The students can be asked to prepare a list of factory made goods they use in their daily life and categorize them as biodegradable and non-biodegradable. List out ten global brands, their logos and products. The students can be taken out for a visit to local industry and asked to prepare a report on their observations regarding raw material used, finished product, production process, labour inputs, environmental impact and social responsibility. The students can be asked to prepare a sketch, poster, poem or write-up about the environmental conditions surrounding an industry. 	 At the completion of this unit students will be able to: Explain key concepts such as, large-scale manufacturing, high technology industry, organizational set up, foot-loose industries, Agri business etc. Identify and explain the factors affecting the location an industry. Differentiate between different types of industries on the basis of size, raw material, ownership and output. Differentiate between cottage industry. Explain the importance of high-tech industries and reason for them being attracted to the peripheral areas of major metropolitan cities. Compare large scale industry and modern high tech industry with examples Understands and analyses the interrelationship between industrial development and standard of living.
6 Tertiary and Qua- ternary Activities	• To understand different types of tertiary activity and its importance in the economy.	 Make a list of economic activities under different categories. Make a list of departmental stores and chain stores that you visit regularly. Class discussion on: How convenient and beneficial the fast-growing service sector in the world. 	 At the completion of this unit students will be able to: Compare and contrast traditional and modern economic activities. Students correlate tertiary activities and their role in the eco- nomic development of a country. Describe different types of tertiary activi- ties. Discuss different types of trading centres found in rural and urban areas and role played by them in local economy.

	1		1
			 Describe quinary activities and its role in advanced economies. Discuss how tertiary, quaternary and quinary activities have replaced jobs in primary and secondary sectors. Define the following terms: BPO, Outsourcing, KPO, Departmental Store, Chain Store, Wholesale trading
7 Trans- port and Commu- nication	 To acquire knowledge about various modes of transport in different continents. To compare and synthesize the information about major transport routes around the globe. To understand the development of communication networks and their impact on the modern world. 	 Students can be asked to do a survey of their class about the means of transport being used by students to reach school. Prepare a Bar diagram with the help of the data collected. Analyze the connection between physical landscape and development of various modes of transport Mark and label the terminal stations of Trans- Siberian Railway, Trans Ca7na- dian Railway and Trans Australia Railway on an outline world map. Draw a sketch map of Suez Canal, Panama Canal, St Lawrence Sea ways and Rhine waterways, and mark them on an outline map of the world. On an outline map of the world mark and label the following major airports of each continent: 	 At the completion of this unit students will be able to: Compare and con- trast various modes of transport. Explain the relationship of transport and com- munication net- works to economic development of a region. Describe the major highways and major rail net- works of different continents. Discuss the location and economic signifi- cance of Trans- Sibe- rian Railway, Trans Canadian Railway, The Union and Pacific Railway and Trans Australian Railway. Describe the loca- tion and the eco- nomic importance of the major sea routes of the world. Discuss how Suez Canal and Panama Canal serve as major gateways of com- merce for both the eastern and the west- ern world.

	1	r		
		а. b. c. d.	Asia: Tokyo, Beijing, Mumbai, Jeddah, Aden Africa: Johannes- burg & Nairobi Europe: Moscow, London, Paris, Berlin and Rome North America: Chicago, New Orleans, Mexico City South America: Buenos Aires, Santiago Austra- lia: Darwin and Wellington	Discuss how the modern communication systems have made the concept of global village a reality.
8 International Trade	 Familiarize the students with the basic concepts and principles of International trade. To understand the basis of International trade, Balance of trade and types of International trade and types of International trade. Gain knowledge about the concept of Dumping. To outline the historical perspective of globalization and Role of WTO, its functions and its implications on the world trade. Examine the importance of sea ports as Gateways of International trade 	• • • a. b. c. d.	Discuss: How Interna- tional trade was carried out in the past vis-a-vis present times. Study the data given on table 9.1 and compare world import and export to calculate balance of trade and analyse its implication. Read the case Study on dumping and discuss how dumping is becom- ing a serious concern among trading nations. Prepare a concept map of the chapter. Mark and label the headquarter of WTO on an outline world map. Mark and label the fol- lowing major sea ports of the world: Europe: North Cape, London, Hamburg North America: Vancou- ver, San Francisco, New Orleans South America: Rio De Janeiro, Colon, Val- paraiso Africa: Suez and Cape Town Asia: Yokohama, Shang- hai, Hong Kong, Aden, Karachi, Kolkata Australia: Perth, Sydney,	 At the completion of this unit students will be able to: Define international trade and describe how it impacts various countries. Describe the basis of International Trade. Discuss types and aspects of International trade. Explain the term Dumping, Trade liberalisation and Globalisation. Discuss the impact of WTO on current global trade. Evaluate how international trade can be detrimental to some nations. Analyse how sea ports act as chief gateways of International trade.
			Melbourne	

India People and Economy

Chapter No. and Name	Specific Learning Objec- tives	Suggested Teaching Learning Process	Learning Out- comes
1 Population: Distribu- tion Density, Growth and Composition	 To correlate population distribution and density with the physiography of India. To familiarize students with the demographic attributes of India 	 Learner may be asked to refer to an Atlas to correlate relief map of India and map of popu- lation distribution and density and write their observation and share with their classmates. Prepare a choropleth map showing the state wise density of popula- tion of India. Represent the data on decadal growth rate (given on page 5 NCERT) in India us- ing suitable statistical diagram. Refer to Census of India website to collect data on population of India. Prepare a dot map showing the distribu- tion of India's Popula- tion. Compare the growth rate of population of different states between 1991-2001 and 2001-2011. 	 At the completion of this unit students will be able to: Differentiate between distribution of population and density of population. Define: Physiological Density, Agricultural Density, Population doubling time, Working Population, Participation Rate, Main Worker, Marginal Worker, Rural Population, Urban Population, Adolescent Population. Discuss the factors responsible for uneven distribution of population in India. Explain trends of population growth in India since 1901. Describe rural-urban population composition, religious composition and sectoral composition of work force in India. Discuss the occupation-al structure of India's population.
2 Human Settle- ments	• To understand how the form and size of settle- ment of any particular region reflects human relationship with the environment.	 The students will prepare a line graph to show the growth of urban population in India since 1901. The students will mark and label the million plus cities of all the states on a political map of India. Case Study: Amravati 	 At the completion of this unit students will be able to: Differentiate between rural and urban settlement. Describe the factors that govern the types of rural settlement in India. Compare and contrast clustered, semi clustered, Hamleted and

		https://smartcities.gov.in/ sites/def_ault/files/SmartCi- tyGuidelines.pdf https://assccl.ap.gov.in/ASS- CCL/ views/V1/Home.aspx	 dispersed settlement with examples. Describe the evolution of towns in India since prehistoric times. Classify towns on the basis of their
3 Land Re- sources and Agriculture	 To familiarise students with the land-use categories as maintained in the land revenue records. To analyse the changes in land- use pattern registered in India due to change in shares of primary, secondary and tertiary sectors in GDP. 	 The students will study and document the land use around their school and speak to their elders to find out changes registered in land use. The students will read and interpret the bar graph (fig 5.1) comparing the changes in land use in India between 1950-51 and 1914-15. Using the data given in the appendix (vi) the students will Work out the actual increase and rate of increases for all the land use categories between 1950-51 and 2014-15. The students will prepare pie graphs to show the land use categories in 1950-51 and 1914-15. The students will prepare pie graphs to show the land use categories in 1950-51 and 1914-15. The students will calculate cropping intensity using data from table 5.1 The students will represent the geographical conditions required for the growth of different crops in a tabular form and compare them. On political map of India the students will mark and label three largest producing states of Rice, Wheat, Jowar, Pulses, Oilseeds, Cotton, Jute, Sugarcane, Tea and Coffee. 	 the basis of their functions. At the completion of this unit students will be able to: Name and define the land use categories. Compare the Changes in shares of Land-use Categories in India between 1950 and 2014. Discuss the importance of common property resources for the community. Compare dryland and Wetland farming and evaluate its importance. Compare the geographical conditions required for the growth of the following crops and their distribution/growing areas. Rice, Wheat, Jowar, Pulses, Oilseeds, Cotton, Jute, Sugarcane, Tea, Coffee Evaluate technological developments that have taken place in Indian agriculture since Independence. Discuss the challenges faced by the Indian farmers and suggest measures to overcome them.

4	• To familiarise students	• List out the major	At the completion of this unit
4 Water Re- sources	• To familiarise students about the water resourc- es available in India and the factors that deter- mine spatial distribution of the available water resources in the country and its utilization.	 List out the hajor sources of water. Discuss the interrelationship between physical and human envi- ronment and their impact from local to global. Ralegan Siddhi case study to be discussed to understand the holistic impact of Wa- tershed development in any place. Students can also be encouraged to see the stories of Haryali, Neeru-Meeru (Water and You) programme (in Andhra Pradesh) and Arvary Pani Sansad (in Alwar, Rajasthan) 	 At the completion of this that students will be able to: Describes the available water resources in India. Evaluates the water demand and supply in India. Discuss the reasons for water scarcity in the country. Discuss water resources in India, its geographical distribu- tion, sectoral utilization, and methods of its conserva- tion and management. Recognize various emerging water prob- lems and analyse the causes for deterioration of quality of water. Evaluate the scope to use rainwater harvesting techniques to conserve precious water resources.
5 Mineral and energy resources	 To know about distribution of various minerals in the world. To understand and realize the importance of minerals in human life. To create an awareness about nature of different minerals and how to sustain them for the future. 	 The students should be encouraged to read newspaper regularly and discuss environmental im- pact of mining. The students should create awareness in school through posters and role play about the use of renewable resources and con- servation of energy resources Prepare a table to present the spatial pattern of the follow- ing minerals under the given headings: (Properties, Total Reserves, Distribu- tion, Mines) Iron Ore, Man- ganese, Bauxite, Copper, Mica, Coal, Petroleum and natu- ral Gas. 	 At the completion of this unit students will be able to: Classify minerals on the basis of chemical and physical properties. Describe the major mineral belts of India and mark them on an outline map of India. Describe different types of non- conventional mineral resources. Analyse why the renewable energy resources will be the future source of resources. Suggest measures to conserve our nonrenewable resources.

			 On an outline political Map of India mark and label the following: a. Iron-ore mines: Mayurbhanj, Bailadila, Ratnagiri, Bellary b. Manganese mines: Balaghat, Shimoga c. Copper mines: Hazaribagh, Singhbhum, Khetari d. Bauxite mines: Katni,
			 Bilaspur and Koraput e. Coal mines: Jharia, Bo- karo, Raniganj, Neyveli f. Oil Refineries: Mathura, Jamnager, Barauni
6 Planning and sus- tainable develop- ment in Indian Context	To understand the need for centralised planning (sectoral planning and regional planning) to acceler- ate uniform economic development over space as well the role of NITI Aayog.	 Case Study – Integrated Tribal Development Project in Bharmaur Region. Case Study- Indira Gandhi Canal (Nahar) Command Area. Critically evaluates the need for, aims of, and impacts of irrigation on Indira Gandhi Canal (Nahar) Command Area. 	 At the completion of this unit students will be able to: Develop an understanding about various types of planning. Justify the need for target areas and target groups planning by the Planning Commission with examples. Explains the aims and approaches of the Hill Area Development Programme, Drought prone area Programme, Critically evaluate the aims and social benefits of ITDP in the Bharmaur tribal region. Evaluate the measures that can be taken to promote sustainable development in Indira Gandhi Canal Command Area.

7	• To acquire knowledge	• Draw a flow chart	At the completion of this unit
Transport	about various means	to show the means	students will be able to:
and com-	of transport spread in	of transportation.	• Develops an under-
munica- tion	different parts of India.To compare and cor-	 Collect information on Metro rail of India 	standing about various
uon	relate various modes of	and discuss in the	means of transport

			golden quadrilateral

8 Internation- al Trade	To familiarise students about the changes that have taken place in India's international trade in terms of vol- ume, composition and direction.	 Study the graph (11.1) showing India's import and export and comment on India's balance of trade. Make a list of items that are in India's import and export basket. Make a list of In- dia's major trading partners and identify these countries on a world map. Name the nearest domestic and interna- tional airports from your school. Study fig 11.5 and Identify four cities from where maximum number of air routes converge. Discuss the reasons for the same with your classmates. 	 At the completion of this unit students will be able to: Give reasons for changing pattern of the composition of India's import and export. Discuss the strategies adopted by India to double its share in the international trade. Evaluate the role of sea ports as gateways of international trade with examples. Mark and label the major sea ports and airports on an outline map of India. Major Sea Ports: Kandla, Mumbai, Marmagao, Kochi, Mangalore, Tuticorin, Chennai, Vishakhapatnam, Paradwip, Haldia International Air ports: Ahmedabad, Mumbai, Bengaluru, Chennai, Kolkata, Guwahati, Delhi, Amritsar, Thiruvananthapuram & Hyderabad.
9 Geo- graphical Perspec- tive on selected issues	• To explain the causes and consequences of different types of pollution in India and suggest the measures to control it.	 List the major sources of water pol- lution, air pollution, noise pollution and land pollution. Identify the most pol- luted stretch of river Ganga and river Yamu- na on an outline map. Look into the dust- bin in your school and make a list of solid waste gener- ated by students. Prepare a poster to create awareness about Namami Gange Pro- gramme. 	 At the completion of this topic the students will be able to: Classify types of pollution based on the medium through which pollutants are transported and diffused. Explain various sources of pollution and summarise the state of water, air, land and noise pollution in India. Analyse the rural-urban migration and its role in pollution. Describe the health and social problems of slum dwellers with reference to Dharavi.

	 Speak to a rag picker and try to find out what he/she does with the waste. Read the case study of a migrant labourer (Given in NCERT) and enact his/her life in your classroom. 	 Describe the natural and human causes of land degradation and suggest measures to control land degrada- tion in India. Suggest measures to control different types of pollutions and evaluate the effective- ness of the Swachh Bharat Mission. Discuss the problems related to urban waste disposal and suggest measures to convert waste into wealth.
--	--	---

Practical Work in Geography Part II

Practical Work in Geography Part II			
Chapter No. and Name	Learning Objectives	Suggested Teaching Learning Process	Learning Outcomes
1 Data its source and compilation	• To understand the importance of data and its uses in Geography	• Collect Primary and Sec- ondary Sources of data from different sources and exhibit in practical file	 Define data. Differentiate between primary and secondary sources of data. List several sources of data.
2 Data Pro- cessing	 To calculate Measures of Central tendency To Compare Mean, Median And Mode 	Calculate Mean, Median and Mode using direct and indirect method	 Calculate the mean rainfall of your city List ten Himalayan peaks with their heights. Calculate the median height using the data
3 Representa- tion of data	To represent data graphically using different tech- niques	 Construction of Line Graph Bar Graph Poly Graph Line and Bar Graph Multiple Bar Diagram Compound Bar Diagram Pie Diagram Pie Diagram Dot Map Choropleth Map Isopleth Map 	 Construct a line graph to represent the growth rate of Population in India 1901-2011. Construct a polygraph to compare the growth of sex ratio in different states. Construct a line and bar graph to represent the average monthly rainfall and temperature of Delhi. Construct a multiple bar diagram to represent decadal literacy rate, male literacy and female literacy. Draw a pie diagram to show India's export to major regions of the world 2010-2011.

		 Construct a dot map to show India's Population 2011. Construct a choropleth map to show state wise variation in population density.
4 Spatial Information Technology	 To understand the need to capture data from different sources and integrate them using a computer that is supported by geo-processing tools. To learn basic principles of the Spatial Information Technology and its extension to the Spatial Information System, which is more commonly known as Geographical Information System. 	 Explain what is Spatial Information Technology or GIS. Describe the advan- tages of GIS over manual methods. Components of GIS. Spatial Data formats: Raster data format Vector data format. Spatial Analysis: Overlay and Buffer Analysis.

Map Items for identification only on outline political map of the World Fundamentals of Human Geography

Chapter No. and Name	Map Items
1. Human Geography	Nil
2. The World Population Density Distribution and Growth	Nil
3. Human Development	Nil
4. Primary Activities	 Areas of subsistence gathering (Fig 4.2) Major areas of nomadic herding of the world (4.4) Major areas of commercial livestock rearing (4.6) Major areas of extensive commercial grain faming (4.12) Major areas of mixed farming of the World (4.14)
5. Secondary Activities	Nil
6. Tertiary and Quaternary Activities	Nil

9-Geographical Perspective on selected issues and problems	Nil	

Guidelines for Internal Assessment/ Geography Practical

- A practical file must be prepared by students covering all the topics prescribed in the practical syllabus.
- The file should be completely handwritten with a cover page, index page and acknowledgment.
- All statistical diagrams and maps should be drawn neatly with appropriate headings, scale, index etc. Data to draw statistical diagrams can be taken from the NCERT text book or Census.
- The practical file will be assessed both by the internal and external examiners at the time of CBSE practical examinations.
- A written exam of 25 marks will be conducted based on the above given practical syllabus on the day of the practical exam.
- Viva will be conducted based on **practical syllabus** only.
- Written Exam 25 Marks
- Practical file 02 Marks
- Viva 03 Marks
