THE NEW HOOK BUTT PLATE

ANSCHÜTZ

EINFACH EINS WERDEN!

NEW - HOOK BUTT PLATE MASTER

PERFECT FOR EVERY SHOULDER SIZE

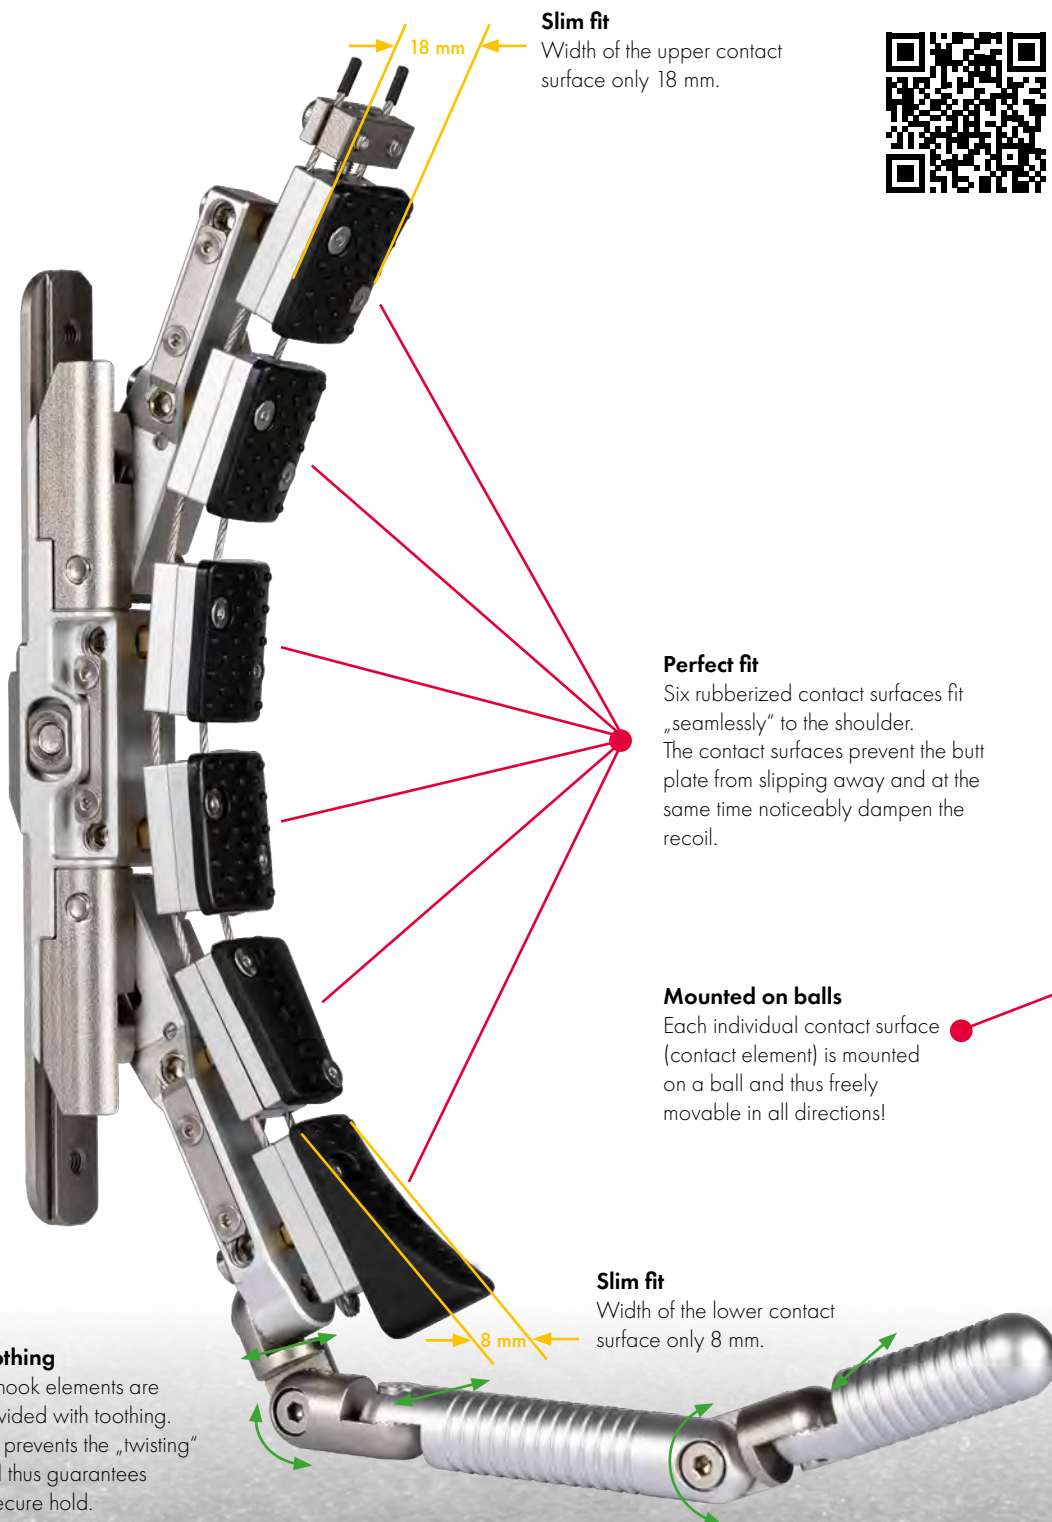

Patented system for self-adjustment and pressure distribution. Six individual contact elements, infinitely adjustable in all directions, guarantee the perfect fit for every shoulder.

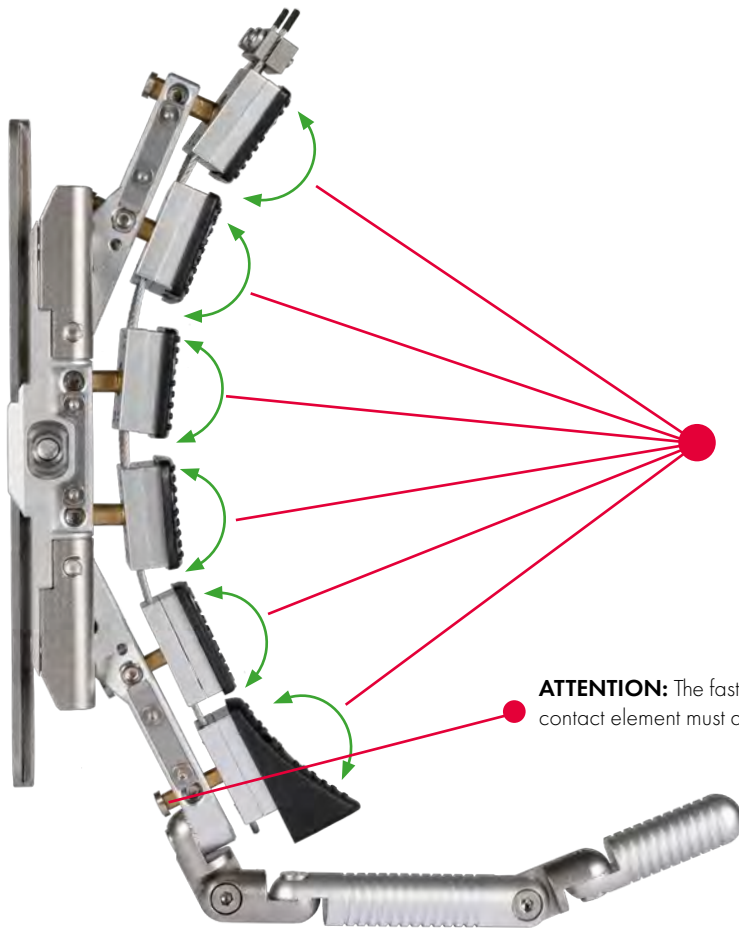

Wire connection and rubberized anti-slip surfaces noticeably cushion recoil and keep the rifle securely in position. The hook is adjustable in all directions.

Can be mounted on all ANSCHÜTZ butt plate carriers of the small bore stocks.

See all the benefits and more information of the new hook butt plate MASTER here!

Six contact elements

Depending on the shoulder size, fix the top contact element used. The contact elements in between adjust themselves when the shoulder is put on for optimum pressure distribution. Depending on requirements, the individual contact elements can then be fixed in place or used freely stored.

ATTENTION: The fastening of the lowest contact element must always be fixed.

Hook fastening

The compact attachment of the hook to of the butt plate offers space under the shoulder, especially in the standing position.

The contact elements

Via the six set screws installed in the contact elements, each individual contact element can be fixed, if desired.

Wire connection of the contact elements

All 6 contact elements are connected to each other via a wire! This achieves an optimal pressure distribution of the butt plate in the shoulder.

Fixing screws

of the contact elements.

Adjusting screw

For adjusting the wire connection.

Base plate

For mounting the hook butt plate on the butt plate carrier, with scale for repeatable and reproducible height adjustment.

Upper butt plate adjustment

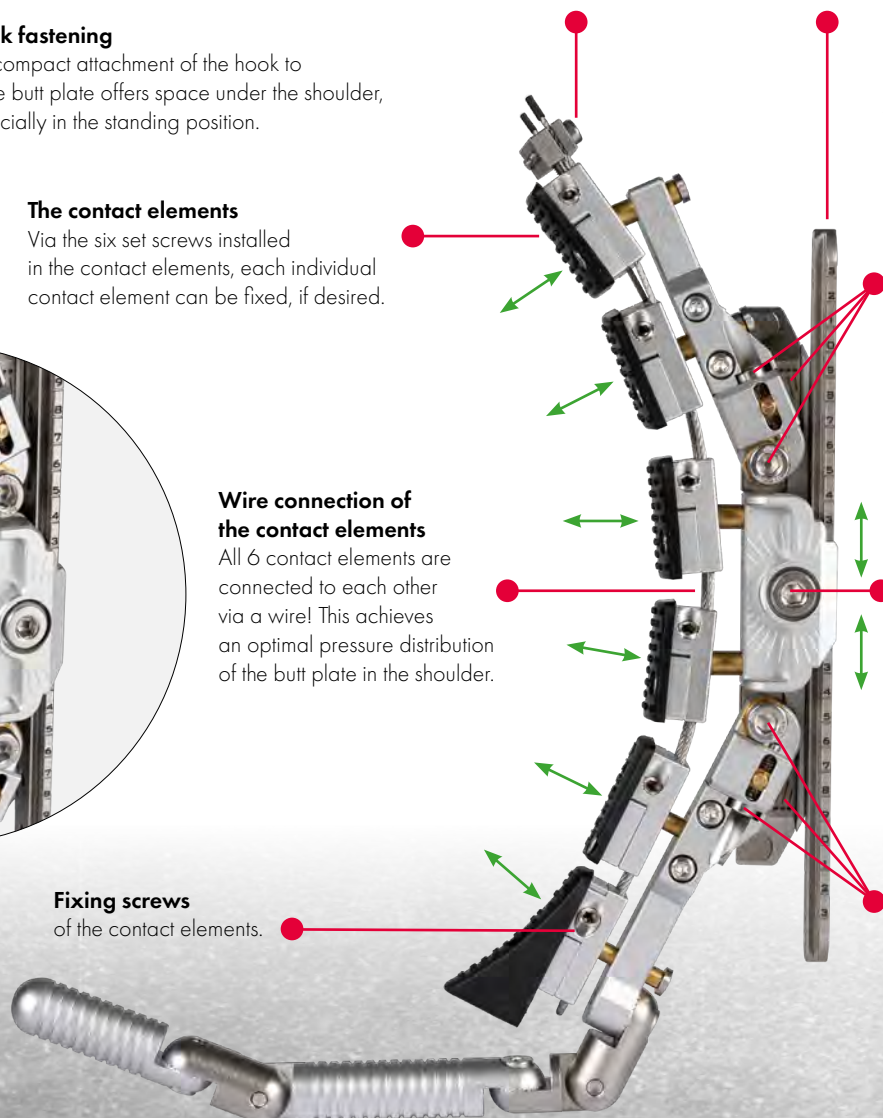

After opening the fixing screw, the angle of the upper butt plate can be adjusted by the fine adjustment screw. Because of the scale, the adjustments can be reproduced accurately.

Height adjustment

Screw for height adjustment of the hook butt plate.

Lower butt plate adjustment

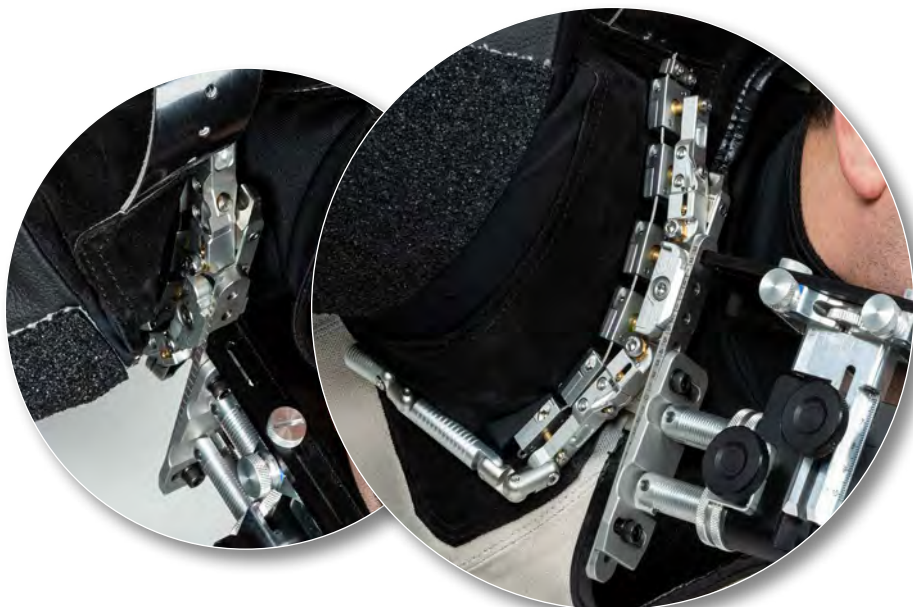

After opening the fixing screw, the angle of the lower butt plate can be adjusted by the fine adjustment screw. Because of the scale, the adjustments can be reproduced accurately.

Perfect hold in every shoulder

The hook butt plate MASTER adapts perfectly due to the movable contact elements to any shoulder size.

The contact elements follow the movements of the shoulder and reliably maintain a good fit in shooting position.

Hook butt plate MASTER

Item No.: 016410 (with guide plate and hook)

Item No.: 016416 (without guide plate and hook)

Item No.: 016417 (hook single, for hook butt plate MASTER)
