

# Gehmann 404 Jacket Sizing Guide

**Note: When measuring, please wear the clothing you would normally wear under your shooting jacket and pants when shooting**

**The measurements in the chart are the measurements of the jacket – not of the body!**

**Example: If your chest measurement is 100cm and in the chart there is a chest measurement of 100cm for size 52 you have to choose a minimum one size larger to ensure the jacket fits**

**Please use the measurement diagram guide below when taking your measurements**

**Measurements are in cm's**
