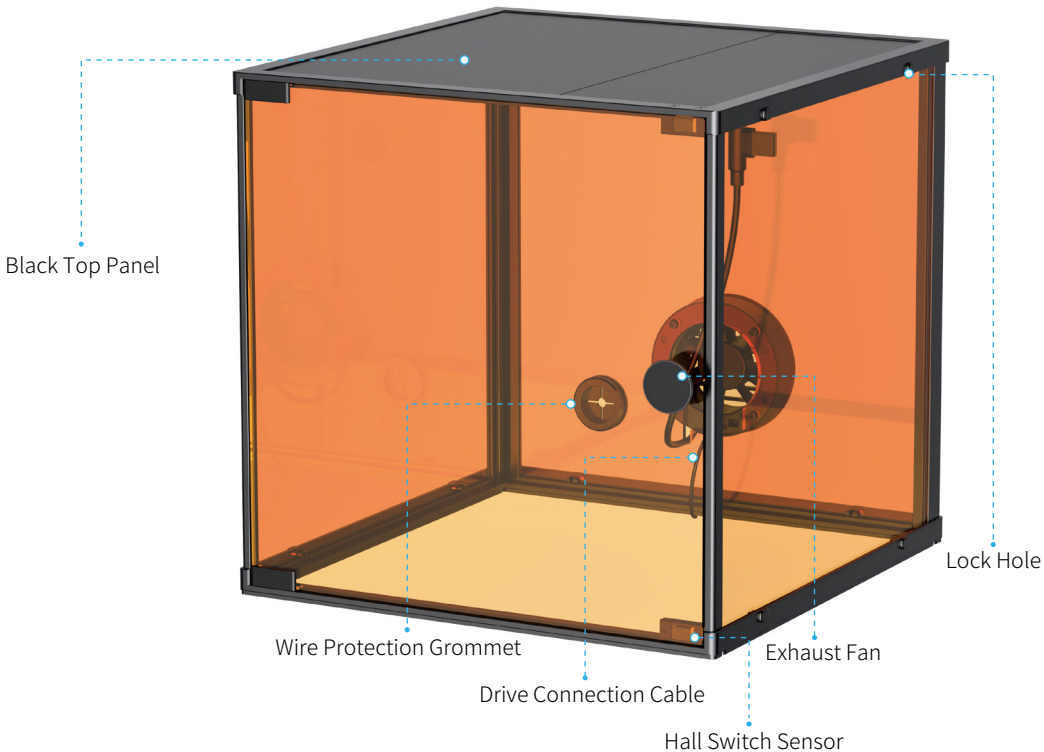
Lock *12

USB HUB *1

User Manual *1

Component Overview



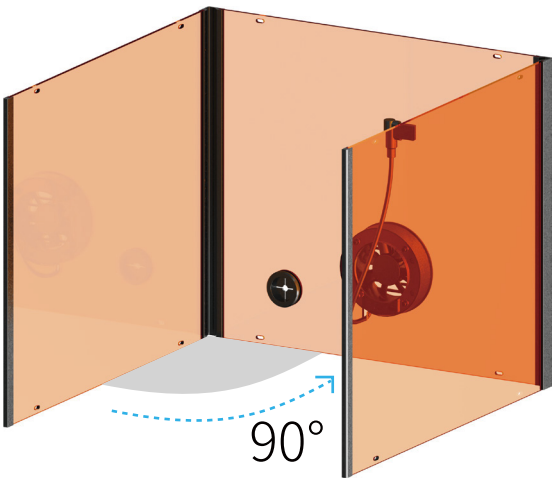
03/Fast Assembly Guide

1 Place the bottom fixed frame on a flat surface as shown below.

Tips: The side with a drive connection cable is the back of the protection cover.

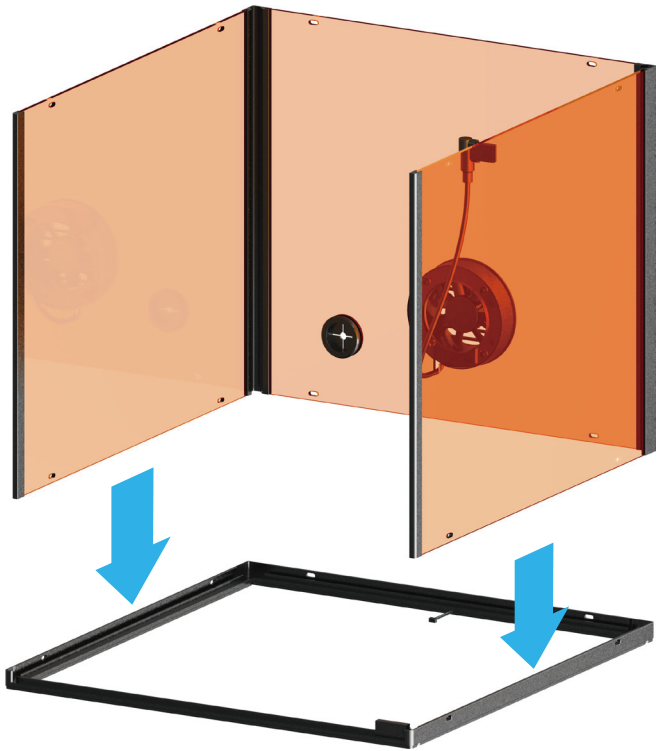
2 Fold the tri-fold protective shields inward by 90° as shown below.

Tips: The side with an exhaust fan is the back of the cover.

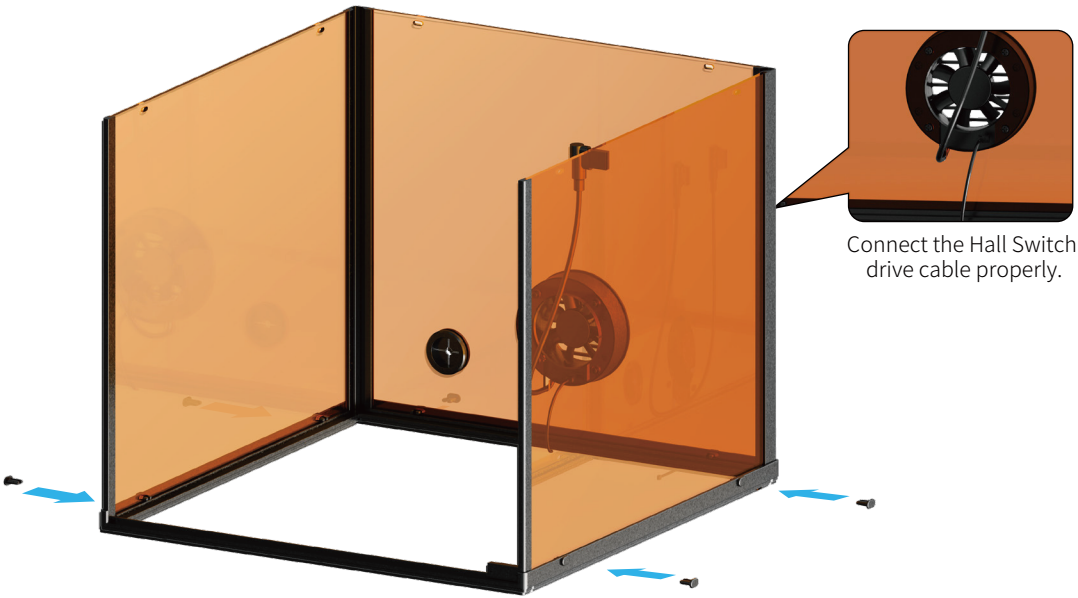


3 Install the tri-fold protective shields to the bottom fixed frame as shown below.

Tips: Please put both the drive and fan connection cable inside of the protection cover during installation, and ensure the shields are tightly fixed with the frame.

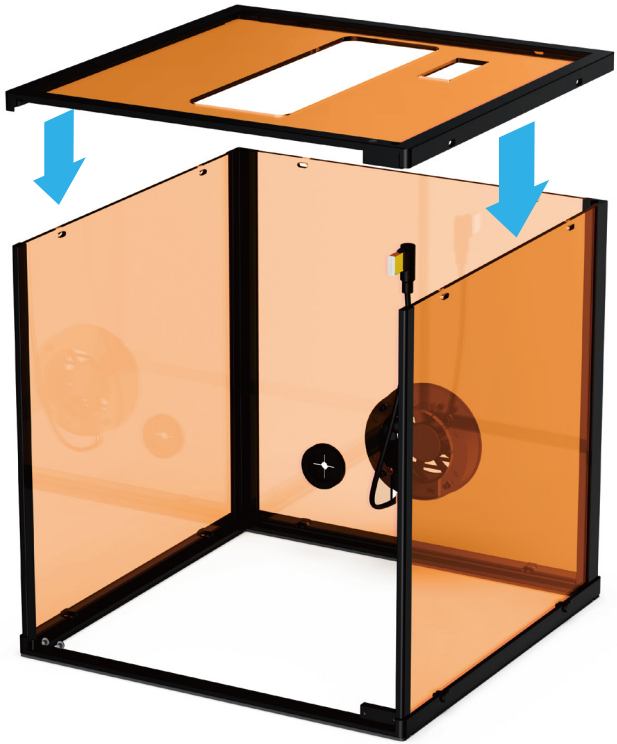


4 Insert six locks into three sides of the bottom fixed frame and fix the drive connection cable as shown below.

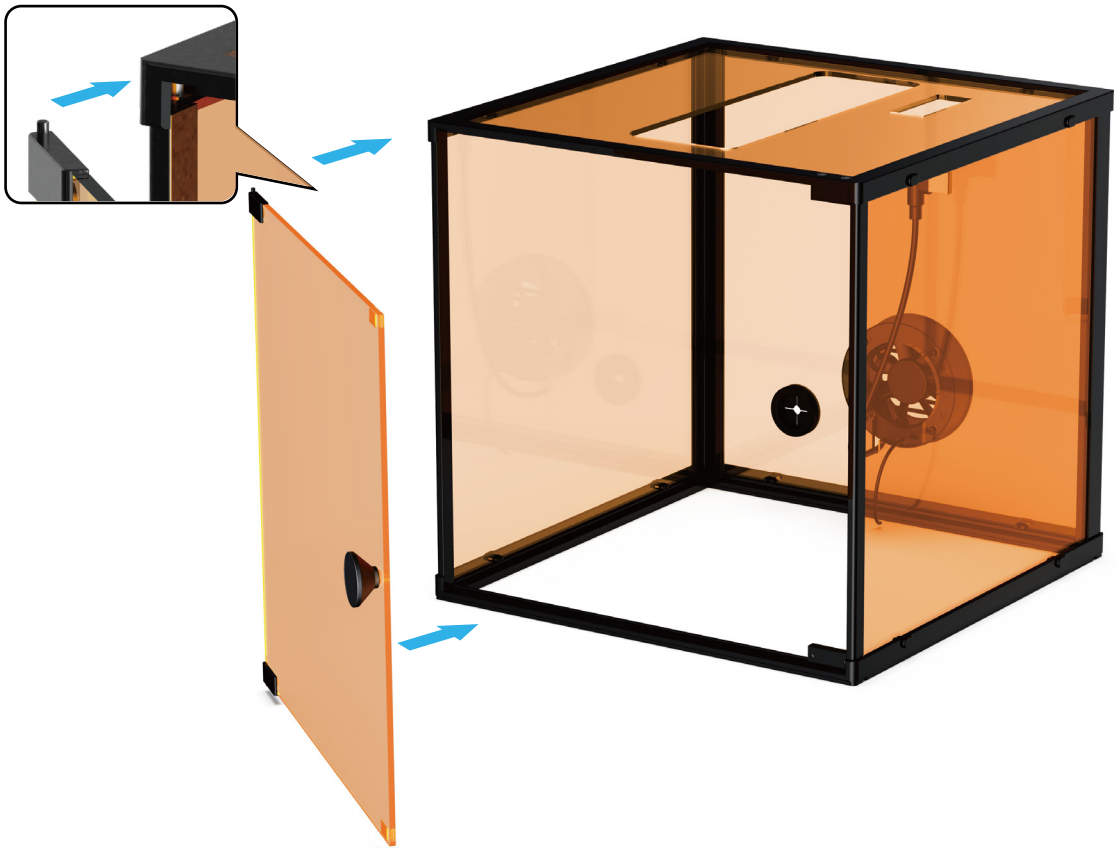


Connect the Hall Switch drive cable properly.

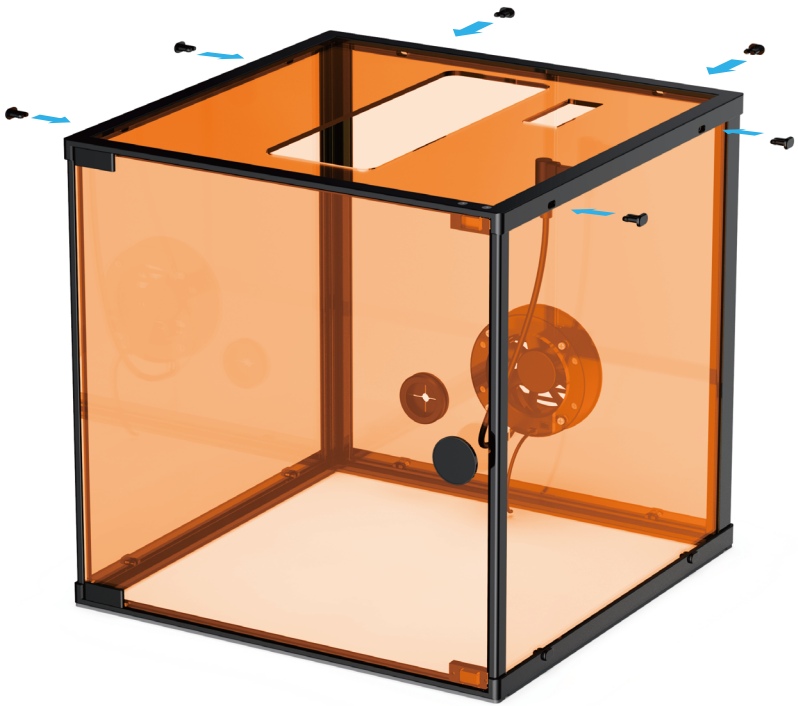
5 Put the top retainer plate on the tri-fold protective shields as shown.



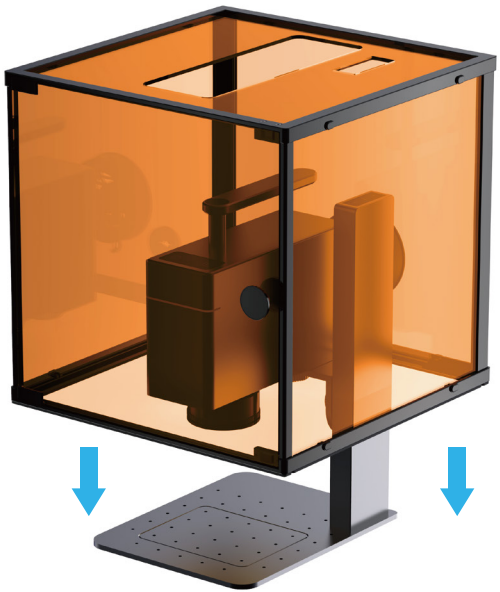
6 Install the door shield by aligning the side with dowel pin to the upper and lower mounting holes.

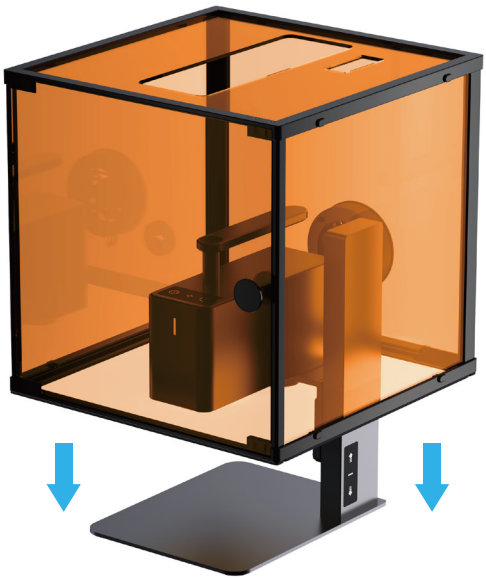


7 Press the top retainer plate and insert locks into its three sides.

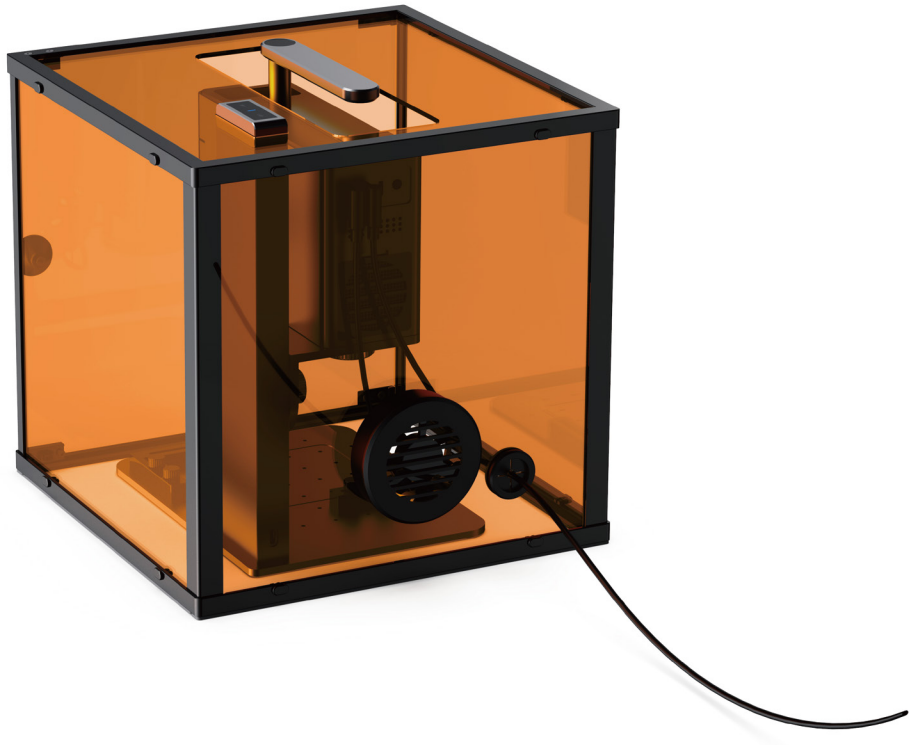


8 Cover it to LaserPecker 2 & LaserPecker 3 by aligning to the hole position. Adjust the position to make them perfectly match.

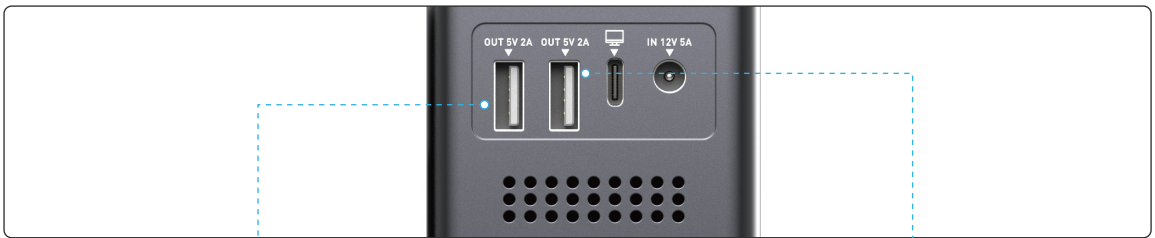




9 Connect the exhaust fan's cable from the bottom, and connect the power cable from the wire protection grommet as shown below.



Expanded Use- Connect the Power Cable



Connect the Accessories

Versatile Electric Roller

Connect the Laser Protection Cover and the Electric Stand
