

UAP4 Universal Attachment Plate

4-Hole Attachment Plate Product Information

Introduction:

Prosthetic Design's **UAP4** universal attachment plate is a high-strength, Aluminum base plate with Urethane top cushion and sealing surface. The **UAP4** is compatible with all Prosthetic Design attachment components. The unique design of the **UAP4** is suitable for all cushion liner socket systems, including Elevated Vacuum, Suction and Non-Vacuum suspension systems.

Features

1. Urethane top cushion and sealing surface
2. CNC-machined, black anodized aluminum base
3. Attaches to most European 4-hole pattern attachment components
4. Corrosion-resistant hardware

Benefits

1. Allows for modular attachment of non-locking socket systems (including vacuum, suction, non-vacuum systems) utilizing a cushion liner
2. Simple, secure socket attachment eliminates leaks present in other attachment plates
3. Concave design allows for a smooth transition between the liner and socket wall
4. Textured design observed to minimize movement at liner distal interface

SPECIFICATIONS:

Added Height: 12 mm (1/2 in)
Weight: 72g (2.2 oz)
Load Rating: 350 lbs (160 Kg)
Includes: (4) M6X25 bolts

All Activity Levels

CONCAVE DESIGN

UNIVERSAL COMFORT AND COMPATIBILITY
