eClaims

eClaims provide the only electronic claims solution that's truly integrated with your software.

Send claims to payers who accept electronic submissions and identifies those who only accept paper claims.

Save money and time while reducing errors and ensuring patient satisfaction!

Plus be HIPAA compliant, reduce paper waste and meet contactless guidelines.

Faster Reinbursments

Integrated directly into your product, no work arounds, no manual data entry which reduces errors, **secure**. Less errors reduces payment turn around time. Pre-screened to reduce rejections.

Give your front desk staff **more time** to deal with patients and more time to follow up on unpaid claims to ensure faster payments. **Reduce billing errors** to help with patient satisfaction.

Save Time and Minimize Errors

Easy Integration and Reporting

Run a **detailed confirmation** report to ensure submissions were successful. Electronic attachments instantly send radiographs, photographs and other information to the insurance company.

What can your practice expect to save using eClaims?

Along with incredible time savings for your billing and admin staff, practices also save money!

You may be wondering: "What level of savings can my practice expect from switching to eClaims?"

While every office experiences different savings, you can use our eClaims savings calculator to find out what your practice could save!
