Phoenix Weekly Release 0.0.0.1019

**Phoenix Online DPMS**

# Weekly Release

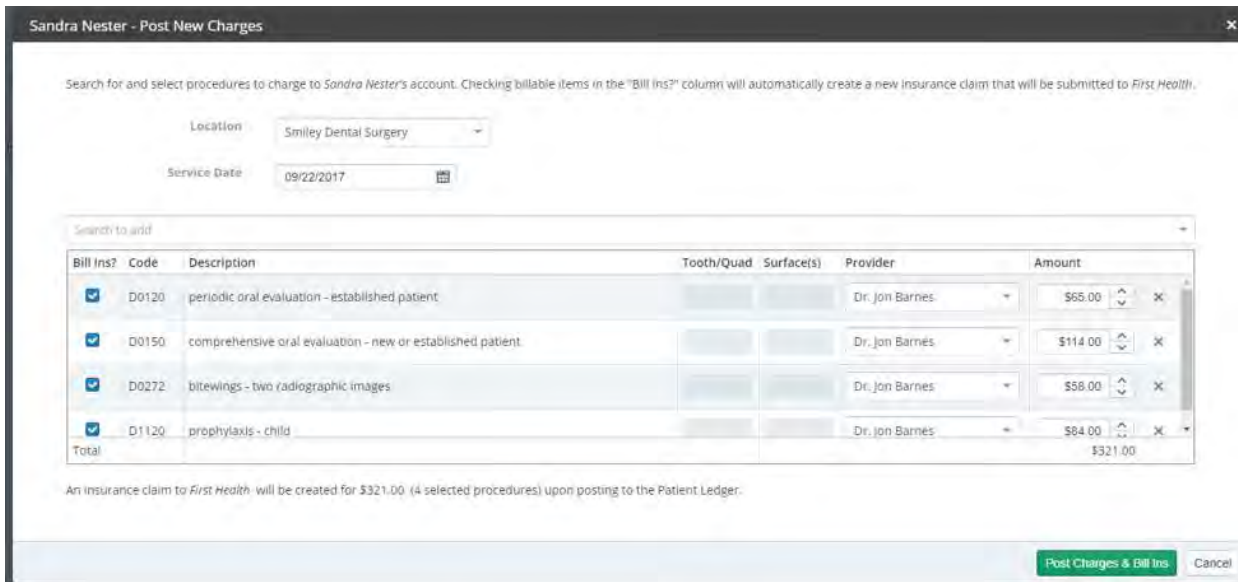

Build 0.0.0.1019 | September 22, 2017

These are the highlights of the new features available in this week's Phoenix DPMS release.

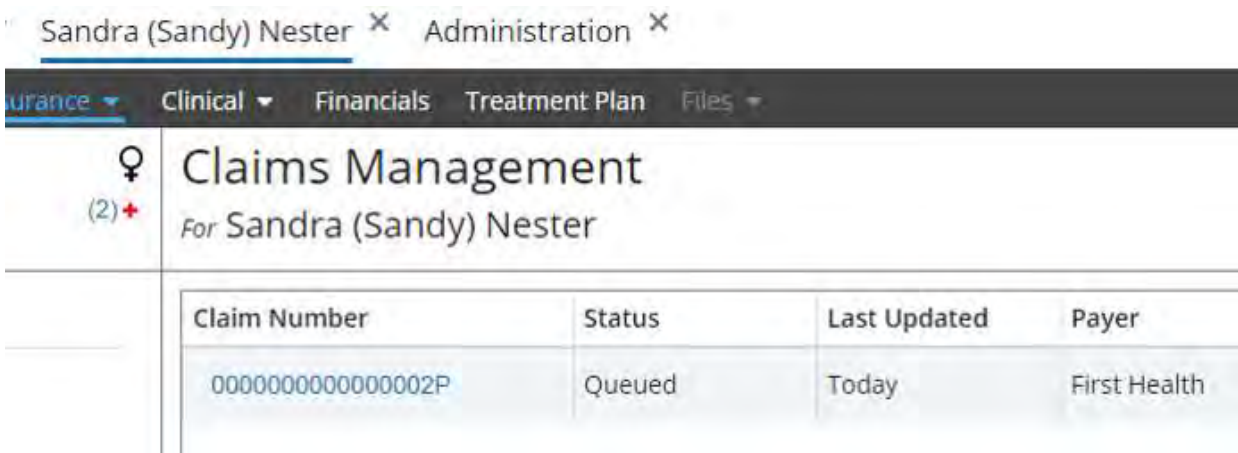

## Introduction to Claims Processing

In this release, the first version of insurance claims processing has been added. We will continue to add additional claim features over the course of the next weeks. Users can now create claims as part of the procedure posting process. When a set of procedures are ready to be posted and a patient has insurance, a claim will be produced.

On the New Charges screen, any procedure that has "Bill Ins." checked will be added to the claim record. Details regarding the claim will shown at the bottom of the dialog.

Once "Post Charges & Bill Ins" is clicked, the claim record will be generated and can be viewed directly from the patient record.

NOTE - that at this time, the "patient pays" amount will not change. Fee schedules and allowances will be accounted for in a later release.

# Claims Management

Filtered by All Providers

Claim Number	Status	Last Updated	Payer	Plan
0000000000000001P	Queued	Today	Delta Dental of NY	Southwest Airlines
0000000000000002P	Queued	Today	First Health	Autozone

**Claim 0000000000000002P for Sandra (Sandy) Nester to First Health**

From the practice record, all of the claims generated can be viewed. From here, the claim details can be expanded. In the coming weeks, additional options and processing options will become available.

## Optimizations and Fixes

The following fixes and optimizations have been also been added to Phoenix.

1. Technical preparations for restorative charting.
2. Compatibility with newest version of Chrome.
3. Diagnostic Logging improvements.
4. Technical preparations for next week's claim processing expansion.
