Sensei Cloud Release 0.1.7327

Sensei Cloud

Weekly Release

Build 0.1.7327 | January 23rd, 2022

This week's Sensei Cloud updates continue to expand core application functionality and deliver on recent customer requests.

Optimizations and Fixes

The following fixes and optimizations have been added to Sensei Cloud this week.

1. Addressed a formatting issue in the exported Applied Payments report in which date and columns were misaligned.
2. Resolved a bug in which inactive versions of CDT codes were sometimes included in the Allowance Table Details for an insurance plan (appearing as duplicates).
3. Fixed a defect in which a temporary directory is used for acquisition storage when the 'Imaging Directory' is left blank / null in the Imaging Settings and the CSI

imaging client is launched from the application.

4. Resolved an issue in which the procedure category was not being correctly assigned to updated CDT codes, resulting in problems with defining coverage rules in the Allowance Table Details.
5. Addressed a UI defect in which the banner details on some screens were not displaying correctly.
6. Fixed a workflow issue in the Hard Tissue Chart in which the 'Reset Tooth Graphic' control was sometimes not available after undoing (removing) an existing multi-tooth charting event (e.g., partial denture).
7. Resolved a bug in the Schedule DayView in which the creation of a Time Lock prevented the selection of multiple chairs.
8. Fixed a bug with the filter controls in the Applied Payments screen in which only a single value could be selected for the 'Credits of Type' filter.
9. Resolved an issue with automatic payments for orthodontic contracts in which additional payments were sometimes processed under certain conditions.
10. Fixed a workflow issue to remove an unnecessary confirmation dialog that is displayed when updating the Imaging Settings.
