Sensei Cloud Release 0.1.7397

Sensei Cloud

Weekly Release

Build 0.1.7397 | February 7th, 2022

This week's Sensei Cloud updates continue to expand core application functionality and deliver on recent customer requests.

Optimizations and Fixes

The following fixes and optimizations have been added to Sensei Cloud this week.

1. [US Only] Sensei Cloud has been updated with the 2022 CDT codes, including 16 new codes (D3911, D3921, D4322, D4323, D5227, D5228, D5725, D5765, D6198, D7298, D7299, D7300, D9912, D9947, D9948, and D9949) and 5 deleted codes (D4320, D4321, D8050, D8060, and D8690).

2. Addressed an issue that arose when creating or saving a Patient Record when the Patient ID field is defined and subsequently cleared.
3. Resolved a UI issue with the Checkout Queue in which the action buttons were sometimes inaccessible at minimum supported resolution when patients have an excessive number of future, scheduled appointments.
4. [UK Only] Fixed a bug in which insurance information was inadvertently displayed on printed patient treatment plans for UK customers.
5. Addressed a defect in which a confirmation dialog would sometimes be incorrectly displayed when creating a new patient record.
6. Fixed an issue which prevented the initial service claim for an orthodontic contract from being regenerated if it had been canceled.
7. Resolved an issue in which newly created patient records were sometimes not recognized and included in search results.
