Sensei Cloud Release 0.1.7844

Sensei Cloud

Weekly Release

Build 0.1.7844 | June 19th, 2022

This week's Sensei Cloud updates deliver on recent customer requests.

Hover Navigation Color Corrected

In some parts of the Sensei Cloud application, the hover color of the Actions bar was difficult to read and not consistent with the rest of the application. This has been corrected in the current release.

Daysheet Reports Timeout Failure

A defect which caused Daysheet Reports to fail due to an application timeout has been corrected in the current release. The query used to generate the report is complex and sometimes did not complete in the allotted time due to the amount of data involved. The timeout period has been extended to accommodate large and/or complicated reports.

Date Values Off by One Day

Several users reported that some date values being displayed incorrectly; the dates were being displayed as one day earlier than the date entered. For example, a patient with a 11/6/2009 date of birth would display as 11/5/2009. This has been corrected in the current release.
