

SPEC SHEET

Aluminum I-Beam Fixed Anchor

ST18AV

Features

Constructed out of aluminum material making it extremely lightweight

Installs in just seconds by easily adjusting the turn locking adjusters to I-Beam width

D-ring is centered on the anchor and moves vertically or horizontally for free movement

Can be used with either a self retracting lifeline or a shock absorbing lanyard

Fits I-beams from 4" wide and adjust up to 18" wide I-beams

The anchor can be conveniently adjusted from both sides for a secure fit

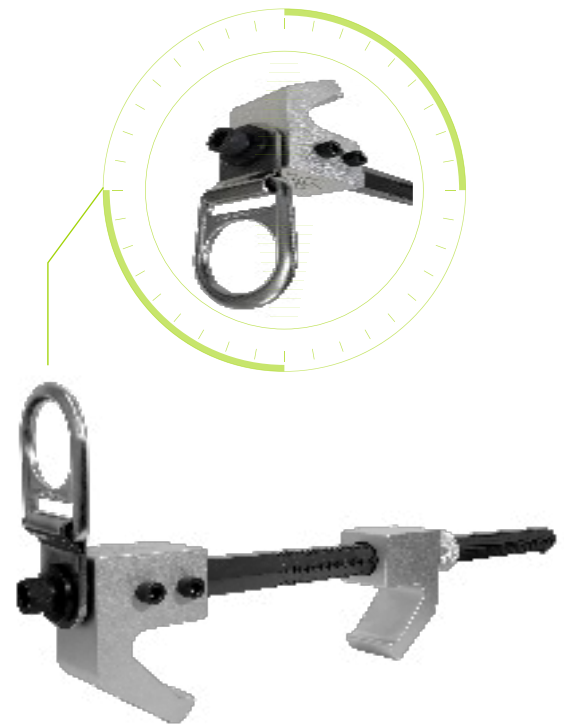

Tensile Strength	5,000 lbs
Max. Capacity	425 lbs

Material Specifications

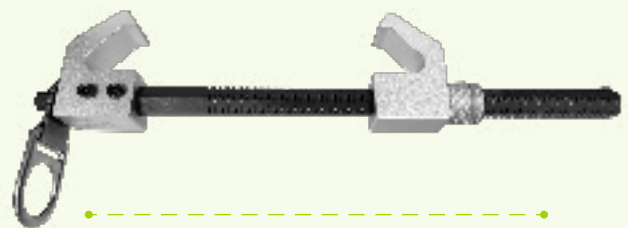

Hex Bar	Aluminum Alloy
Jaws	Aluminum Alloy
D-ring assembly	Alloy Steel
