

## Defining and Measuring Clean for Indoor Healthy Spaces

*A GBAC<sup>™</sup> Experience in partnership with the CPI<sup>™</sup> Innovation Center*

The annual GBAC<sup>™</sup> education event will take place June 19-22, 2023 at the CPI Innovation Center<sup>™</sup> in Holland, MI. This year's focus is on Air Quality, defining clean, active engagement and thought leadership with fellow attendees and exhibitors. Attendees can learn and test out new cleaning technologies in simulated settings such as a restaurant, hospital, and classroom settings, instilling confidence in future investments. Exhibitors will have the opportunity to interact with potential customers like no other symposium.

### *Who should attend?*

- » Property Managers
- » Facility Directors
- » Building Operators

- » General Managers
- » Infection Preventionists
- » Biosafety Professionals

- » Facility Engineers
- » Residential and Commercial Service Providers

### *Why Attend?*

- Engage and interact and learn from fellow attendees and cleaning industry professionals specializing in facility operations.

- Participate in hands-on experiences that simulate your real-world work environment in health care, hospitality, food and beverage, and much more!

- Grow your skill set using approaches to reducing pathogen transmission facility-wide and cutting edge research, new technologies, and programs.

- Benefit from continuous involvement opportunities and multi-disciplinary lectures on indoor air quality management and infection control and prevention.
