

The eTROWEL® & eWALL™ Microfiber Pocket Trowel

The eTrowel® is patented pocket style trowel with flex back and rechargeable black light or LED white light. It has interchangeable color coded grips as well as a scraper for hard to remove pieces of debris. It's ergonomically sound design makes it easy to clean horizontal and vertical surfaces while allowing the pocket style pad to remain securely on the frame.

Patented

Part#s
eWall (360° swivel base)
eHANDLE48 (48" telescopic handle)

Part#s
eTrowelb (black light)
eTrowelw (white LED)
eTrowel (no light)

Patented innovation

The eTROWEL® flexible base allows for cleaning curved surfaces. Color code trowel pads and grips to help prevent cross contamination.

Clean those hard-to-reach places with ease

The 4D Cleaning™ eWall™ has a 360° degree swivel base that allows it to clean in those hard-to-reach vertical surfaces with ease.

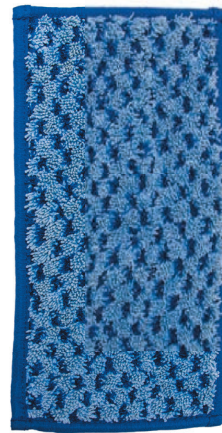

Black light technology

The 4D Cleaning™ eTROWEL® is outfitted with a powerful black light or LED light. The rechargeable battery provides exceptional power 10 hour run time (black light) and 30 hour run time (LED white light). Recharges in 4 hours.

 eTROWELPADB (blue)
 eTROWELPADY (yellow)
 eTROWELPADG (green)

Our Most Universal Microfiber Tool

The patented eTROWEL® offers various trowel pads to effectively clean different surfaces and soil levels. The eTROWEL® eliminates the use of trigger sprayers. The eWAVETROWELPAD™ (pictured below) is made with Trio-Split™ Technology and 4D Cleaning™ mesh backing for quick PreTreating and energy savings in the laundry process. The unique pocket system allows changing the microfiber pads without touching the soiled pad.
