

PLEASE READ

Bumblebees can sting and will defend themselves, please exercise caution and never open the ventilated lid on the inner plastic box.

- Make sure the bees are calm before opening the box, it is always best to wait 15-20 minutes after positioning the hive before opening it.

- Lift the cardboard lid and fold in the inner flap

- Close the lid and re-insert the two remaining tabs to hold the lid down

- Slide the blue slider across to the right, so that **only** the **right** most hole is open.
