

Installation Guide - Browning Silver and LPGWorks Shell Catcher

Due to the material and design of the Browning Silver, this shell catcher requires the installation of an adhesive metal mount.

Contents

- 1 LPGWorks Shell Catcher for Browning Silver
- 2x Adhesive metal mounts
- 1 Isopropanol Alcohol wipe

Installation Direction

1. Use the provided Isopropanol Alcohol wipe to clean any dirt or oils from the side of the receiver where the shell catcher will be installed.
2. Remove the clear protective layer from one of the metal mounts. Only one is required for installation.
3. Place the metal mount into the recess above the magnet on the shell catcher.
4. Remove the 3M adhesive backer from the metal mount.
5. Align the pin on the inside bottom of the shell catcher to the hole along the lip of the loading port and hook the lower portion of the shell catcher to the receiver.
6. Clip the top of the shell catch over the ejection port. The shell catcher should snap on and be flush with the receiver.
7. Remove the shell catcher and make sure the mount has adhered to the receiver.
8. Repeat steps 5 & 6 to reinstall the shell catcher.
9. Installation is now complete.
