

Since we're a Welsh company, we thought it was only fitting to call ourselves Cwtchy (Cu-chee) Covers! Cwtch in Wales means to hug and protect so give your tub a hug with Cwtchy Covers?

## Instructions for Cwtchy Cover insulating jacket

Our insulating jackets for inflatable hot tubs are amazing for keeping as much heat in as possible, helping your hot tub run more efficiently! They also form a protective barrier around your hot tub, helping reduce the risk of punctures! They can also be left on all year round and whilst in use, making them ideal!

- 1 After unpacking the product, please give the jacket 24 hours for the insulation to expand to original size.
- 2 Ensure 'floor-side' label is facing out-wards and on the ground
- 3 Wrap around hot tub with straps meeting at pump unit
- 4 Clip straps together ensuring they're pulled as tight as possible- keeping heat loss to a minimum.
- 5 Fold excess insulation material around pipes for the pump unit- manipulate as needed
