hdmsolar.co.uk

One of the UK's fastest growing solar wholesalers.

Our product partners...

HDM Solar are THE Wholesaler of renewable energy products delivering across the UK. We are driven by a commitment to supply quality products, provide excellent customer service, assist with helpful technical expertise and deliver great value to all our customers.

With years of experience in the industry, we have established ourselves as experts, providing tailored solar solutions for installers and specifiers in residential, commercial, and industrial applications.

Our team of knowledgeable professionals are dedicated to guiding you through every step of

your renewable energy equipment requirements. From our initial consultation with you through to system design and the supply and delivery direct to your site, we are here to ensure a seamless and efficient experience.

We believe in the power of collaboration and partnership. We work closely with industry-leading manufacturers, to bring you the highest quality solar products. Our relationships with these trusted brands enable us to offer a comprehensive range of solutions that meet the highest standards of performance and reliability.

Daily deliveries nationwide. Rapid, reliable, same day.

Same day deliveries

We know what it is like when you need something quickly to keep a project on track so we offer a same day delivery service.

Electric vehicles

For short and medium delivery routes we use a fleet of electric vans. This helps us reduce our carbon footprint.

Live tracking

You will always know where your order is, helping you to efficiently plan your schedule. We will send you a link in your transit confirmation.

Electronic PODs

Traceable, electronic paperwork sent to you so you can keep control of your project documents.

Sunsynk Innagator

1MW battery storage - in a container.

The Innagator Series is a high-voltage lithium-ion battery system with a wide temperature operating range, offering ultimate flexibility. It provides a reliable backup power supply for supermarkets, banks, schools, farms, small factories and more, to smooth the load curve and achieve peak load demand.

This pioneering system guarantees efficient energy storage, management, and distribution, providing answers to numerous power challenges that are prevalent in today's world.

It has been meticulously engineered to enable mass production. Its modular internal construction significantly reduces the costs associated with scaling and maintenance, once the initial unit has been procured.

Available in three different sizes to accommodate varying power requirements and space availability. This product's design and capabilities demonstrate the innovation and foresight of Sunsynk Mobile in anticipating and responding to the energy needs of the future.

Volume imports - direct to site.

We have access to the best brands from across the globe, in bulk. We regularly import products direct from the manufacturer and we are able to pass on the savings to you to help your margins.

We arrange direct delivery straight to the customer's site. If you prefer we can hold your orders in storage ready to be called off when you need them.

To access our unbeatable container pricing and take advantage of discounted rates for large volumes get in touch. Call 0800 0016 802 for expert advice and guidance.

We are a responsible business.

As the world becomes increasingly aware of the impact of climate change, more and more businesses are committing to reducing their carbon footprint. At HDM Solar, we have implemented a series of actions that reduce our impact on the environment.

We have installed solar panels and battery storage at all our sites

We have a fleet of electric delivery vehicles

All our company cars are electric

We have installed electric vehicle charging points at all our sites

We operate a cycle-to-work initiative

In addition to reducing our own emissions, we are also looking at ways to offset our carbon footprint. This includes supporting reforestation

efforts with the Plant A Tree Today Foundation to help capture carbon from the atmosphere.

Reducing our impact also involves a cultural shift within the company towards sustainable practices. This means educating colleagues about the importance of reducing their carbon footprint and encouraging them to think critically about the environmental impact of their actions.

We are socially responsible.

We uphold high standards when conducting our business. We audit our suppliers to make sure they adhere to anti-slavery legislation and prevent modern slavery, human trafficking, and other forms of forced labour.

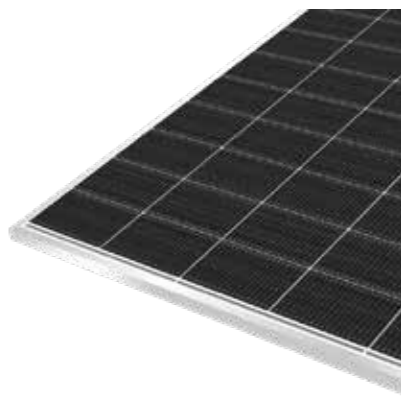

We also support good causes and community projects such as sports teams and charities. Our colleagues are regularly involved in fundraising activities.

We only stock reliable, recognised brands.

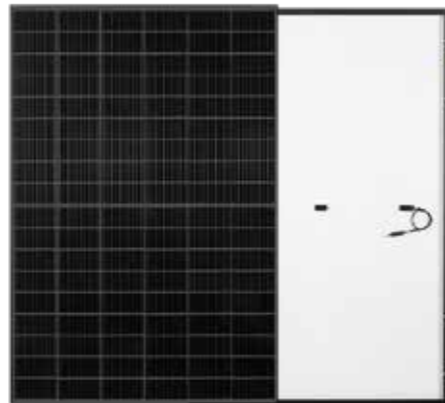

Solar Panels

Premium Range

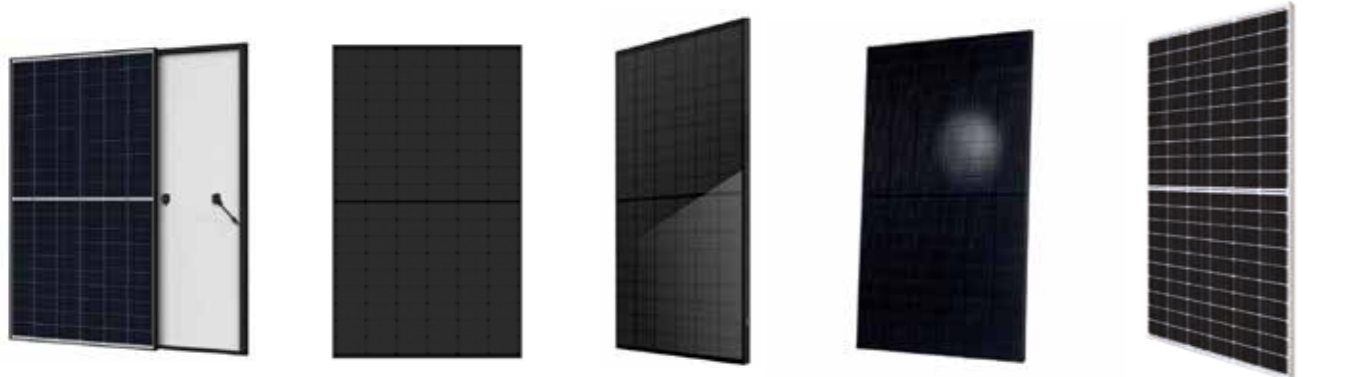

N-Type module with Heterojunction Technology

PREMIUM PARTNERSHIP

The latest Tenka standard size panels use TOPCon technology to deliver more power per panel - Install fewer panels for the same output.

Commercial Range
