One of the most interesting things I found with my personal research on Testosterone Propionate is that when I was using it at a 100 mgs Every-Other-Day, my testosterone levels were still at the high end of normal. This would seem to indicate that drug tested athletes could probably use this same dose and still pass a doping test.

Testosterone Propionate, commonly referred to as "Test Prop" to those in the fitness industry, is one of the esterfied variants of Testosterone. Information about Test Prop was first released way back in 1935 as a result of different ways to figure out the best possible way to maximize the use of Testosterone itself.
