NORDITROPIN SIMPLEXX 5 MG (15IU) - NOVO NORDISK Human Growth hormone (HGH), also known as somatotropin or somatropin, is a peptide hormone that stimulates growth, cell reproduction and regeneration in humans and other animals. It is a type of mitogen which is specific only to certain kinds of cells.

esencijalna aminokiselina, moramo ju unositi hranom jer je tijelo ne moze samo proizvesti a njena funkcija je sinteza proteina u tijelu. Ona je glavni gradivni blok svih proteina, dakle bez nje nema proizvodnje hormona, enzima, antitijela, nema regeneracije kosti, misica, jetre, nema rasta kose..itd. Osim toga nema ni rasta misica, dakle koliko god dobro treniramo ako nema leucina misici nece rasti. Nakon konzumacije njena koncentracija u krvi opada za cca 3 sata, dakle u svakom obroku treba jesti bjelancevine visoke vrijednosti da bi se doseglo cca 2,5-3g leucina po obroku koji ce stimulirati sintezu proteina, MPS. Osim ove funkcije, istrazivanja su opetovano dokazala da poboljsava gubitak masnog tkiva za vrijeme kalorijskog deficita uz ocuvanje misicne mase! S obzirom da blokira katabolizam proteina, usmjerava tijelo da koristi masti kao gorivo. Zanimljivo je i to da je upravo Leucin najanabolicnija aminokiselina koja snazno stimulira lucenje inzulina, te se zbog toga koristi i za liječenje inzulinske rezistencije. Ovu cinjenicu koristimo u sportu upravo u trenutku nakon treninga kad zelimo rast i oporavak misica. Kako? Nakon treninga ispraznili smo glikogen, misic je gladan, konzumiramo li PWM whey sa Leucinom i dekstrozom, dignuti ce brzo inzulin koji ce potjerati nutrijente u stanicu misica. Oporavak, rast, regeneracija, sve ovisi o tome koji i koliko nutrijenata ce uci u stanicu da bi se desila regeneracija. A i treba ih u pravo vrijeme i popiti inace ne zavrse u misic.
