

# NuWhirl *Twist n' Flow* Installation Instructions

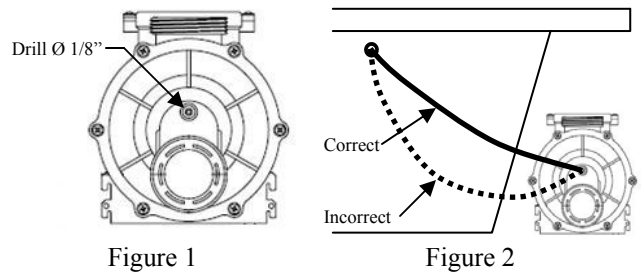

1. Mount the **Twist n' Flow** control in a suitable location by drilling a 1-3/8" diameter hole in the tub.
2. Silicone the flange of the control and assemble the nut hand tight.
3. Drill a 1/8" diameter hole through the port above the pump inlet (Fig. 1).
4. Install the brass fitting with o-ring into the port using a 9/16" socket or wrench until the flange of the fitting is flush with the port - DO NOT OVERTIGHTEN!
5. Attach one end of the tubing to the control or the brass fitting.
6. Cut the tubing to length so that it does not sag and trap water (Fig. 2).
7. Attach the other end of the tubing.
