

KPREDINOX

FIRST AID

TOPICAL HYDROFLUORIC ACID NEUTRALIZER

Made in / Fabriqué au Canada 

This gel effectively and quickly neutralizes hydrofluoric acid, the main ingredient in traditional stainless steel pickling solutions. Easy and painless to apply, KPREDINOX First Aid can be self-administered in case of minor hydrofluoric acid exposure. All KPREDINOX products ship with the acid neutralizing gel.

DIRECTIONS

Wash your hands and gloves with KPREDINOX First Aid every time you handle products containing hydrofluoric acid such as traditional pickling paste to remove all traces of the dangerous acid, thus minimizing the risk of burns.

MATIÈRE ACTIVE

2.5% calcium gluconate. For external use only.

STORAGE AND HANDLING

Store between 15-30° C (59-86° F), away from direct sunlight.

IMPORTANT

ALL hydrofluoric acid burns require medical attention, even when neutralized with products containing calcium gluconate.
